FOREWORD

Through the National Council for Curriculum and Assessment (NaCCA), Ghana's Ministry of Education has introduced a series of curriculum reforms to improve the quality and relevance of learning experiences in pre-tertiary schools in the country. These reforms will improve learning through the introduction of innovative pedagogies that encourage critical thinking and problem-solving. For a long time, our learners memorise facts and figures, which does not develop their analytical and practical skills. The Ministry recognises that learners need to be equipped with the right tools, knowledge, skills and competencies to deal with the fast-changing environment and the challenges facing their communities, the nation and the world.

These curriculum reforms were derived from the Education Strategic Plan (ESP 2018-2030), the National Pre-tertiary Education Curriculum Framework (NPTECF) and the National Pre-Tertiary Learning Assessment Framework (NPLAF), which were all approved by Cabinet in 2018. The new standards-based curriculum implemented in 2019 in basic schools, aims to equip learners to apply their knowledge innovatively to solve everyday problems. It also prioritises assessing learners' knowledge, skills, attitudes, and values, emphasising their achievements. The content of the basic school standards-based curriculum was therefore designed to promote a curriculum tailored to the diverse educational needs of the country's youth. It addresses the current curriculum's deficiencies in learning and assessment, especially in literacy and numeracy. These reforms have been carried out in phases. The curriculum for the basic school level – KG, Primary and Junior High School (JHS) – was developed and implemented from 2019 to 2021.

The curriculum for Senior High School (SHS), Senior High Technical School (SHTS) and Science, Technical, Engineering and Mathematics (STEM), which constitutes the next phase, is designed to ensure the continuation of learning experiences from JHS. It introduces flexible pathways for progression to facilitate the choice of subjects necessary for further study, the world of work and adult life. The new SHS, SHTS and STEM curriculum emphasises the acquisition of 21st Century skills and competencies, character development and instilling of national values. Social and Emotional Learning (SEL), Information Communications Technology, Gender Equality and Social Inclusion, have all been integrated into the curriculum. Assessment – formative and summative has been incorporated into the curriculum and aligned with the learning outcomes throughout the three-year programme.

The Ministry of Education's reform aims to ensure that graduates of our secondary schools can successfully compete in international high school competitions and, at the same time, be equipped with the necessary employable skills and work ethos to succeed in life. The Ministry of Education, therefore, sees the Senior High School (SHS) curriculum as occupying a critical place in the education system – providing improved educational opportunities and outcomes for further studies, the world of work and adult life – and is consequently prioritising its implementation.

ACKNOWLEDGEMENTS

This standards-based SHS curriculum was created using the National Pre-Tertiary Learning Assessment Framework (NPLAF), the Secondary Education Assessment Guide (SEAG), and the Teacher and Learner Resource Packs which include Professional Learning Community (PLC) Materials and Subject Manuals for teachers and learners. All the above-mentioned documents were developed by the National Council for Curriculum and Assessment (NaCCA). The Ministry of Education (MoE) provided oversight and strategic direction for the development of the curriculum with NaCCA receiving support from multiple agencies of the MoE and other relevant stakeholders. NaCCA would like to extend its sincere gratitude, on behalf of the MoE, to all its partners who participated in the professional conversations and discussions during the development of this SHS curriculum.

In particular, NaCCA would also like to extend its appreciation to the leadership of the Ghana Education Service (GES), the National School Inspectorate Authority (NaSIA), the National Teaching Council (NTC), the Commission for Technical

and Vocational Education and Training (Commission for TVET), West African Examinations Council (WAEC) and other agencies of the MoE that supported the entire process. In addition, NaCCA acknowledges and values the contributions made by personnel from various universities, colleges of education Industry players, Vice Chancellors Ghana, Vice Chancellors Technical Universities as well as educators and learners working within the Ghana education landscape.

Special appreciation is extended to consultants who contributed to development of the curriculum. The development process involved multiple engagements between national stakeholders and various groups with interests in the curriculum. These groups include the teacher unions, the Association of Ghana Industries, and heads of secondary schools.

THE SHS CURRICULUM OVERVIEW

The vision for this curriculum is to ensure the nation has a secondary education system that enables all Ghanaian children to acquire the 21st Century skills, competencies, knowledge, values and attitudes required to be responsible citizens, ready for the world of work, further studies and adult life. The nation's core values drive the SHS curriculum, and it is intended to achieve Sustainable Development Goal 4: 'Inclusive, equitable quality education and life-long learning for all'. Above all, it is a curriculum enabling its graduates to contribute to the ongoing growth and development of the nation's economy and well-being.

The curriculum is inclusive, flexible, and robust. It was written under the auspices of the National Council for Curriculum and Assessment by a team of expert curriculum writers across Ghana. It reflects the needs of critical stakeholders, including industry, tertiary education, the West African Examination Council, SHS learners, teachers, and school leaders. It has been written based on the National Pre-Tertiary Learning and Assessment Framework and the Secondary Education Policy.

The key features of the curriculum include:

- flexible learning pathways at all levels, including for gifted and talented learners and those with deficiencies in numeracy and literacy, to ensure it can meet the needs of learners from diverse backgrounds and with different interests and abilities.
- the five core learning areas for secondary education: science and technology, language arts, humanities, technical and vocational and business; with emphasis placed on STEM and agriculture as integral to each subject.
- a structured, standards-based approach that supports the acquisition of knowledge, skills and competencies, and transition and seamless progress throughout secondary education, from JHS to SHS and through the three years of SHS.
- a focus on interactive approaches to teaching and assessment to ensure learning goes beyond recall enabling learners to acquire the ability to understand, apply, analyse and create.
- guidance on pedagogy, coupled with exemplars, demonstrating how to integrate cross-cutting themes such as 21st Century skills, core competencies,

the use of ICT, literacy and mathematics, Social Emotional Learning, Gender Equality and Social Inclusion as tools for learning and skills for life. Shared Ghanaian values are also embedded in the curriculum.

The curriculum writing process was rigorous and involved developing and using a Curriculum Writing Guide which provided systematic instructions for writers. The process was quality assured at three levels: through (a) evaluation by national experts, (b) trialling curriculum materials in schools and (c) through an external evaluation by a team of national and international experts. Evidence and insights from these activities helped hone the draft's final version. The outcome is a curriculum coherently aligned with national priorities, policies and the needs of stakeholders. A curriculum tailored to the Ghanaian context ensures that all learners benefit from their schooling and develop their full potential.

The following section highlights the details of the front matter of the draft curriculum. The vision, philosophy and goal of the curriculum are presented. This is followed by the details of the 21st Century skills and competencies, teaching and learning approaches, instructional design and assessment strategies. The template for the curriculum frame, which outlines the scope and sequence, the design that links the learning outcomes to particular 21st Century skills and competencies, as well as Gender Equality and Social Inclusion, Social and Emotional Learning and Ghanaian values are presented together with the structure of the lesson frame showing the links between the content standards, learning indicators with their corresponding pedagogical exemplars and assessment strategies.

INTRODUCTION

Effective implementation of this Senior High School (SHS) curriculum is the key to creating a well-educated and well-balanced workforce that is ready to contribute to Ghana's progress by harnessing the potential of the growing youth population, considering the demographic transition the country is currently experiencing (Educational Strategic Plan [ESP] 2018-2030). SHS curriculum aims to expand equitable, inclusive access to relevant education for all young people, including those in disadvantaged and underserved communities, those with special educational needs and those who are gifted and talented. Senior High School allows young people to develop further skills and competencies and progress in learning achievement, building from the foundation laid in Junior High School. This curriculum intends to meet the learning needs of all high school learners by acquiring 21st Century skills and competencies to prepare them for further studies, the world of work and adult life. Changing global economic, social and technological context requires life-long learning, unlearning, and continuous processes of reflection, anticipation and action.

Philosophy of Senior High School Curriculum

The philosophy underpinning the SHS curriculum is that every learner can develop their potential to the fullest if the right environment is created and skilled teachers effectively support them to benefit from the subjects offered at SHS. Every learner needs to be equipped with skills and competencies of interest to further their education, live a responsible adult life or proceed to the world of work.

Vision of Senior High School Curriculum

The vision of the curriculum is to prepare SHS graduates equipped with relevant skills and competencies to progress and succeed in further studies, the world of work and adult life. It aims to equip all learners with the 21st Century skills and competencies required to be responsible citizens and lifelong learners. When young people are prepared to become effective, engaging, and responsible citizens, they will contribute to the ongoing growth and development of the nation's economy and well-being.

Goal of Senior High School Curriculum

The goal of the curriculum is to achieve relevant and quality SHS through the integration of 21st Century skills and competencies as set out in the Secondary Education Policy. The key features to integrate into the curriculum are:

- Foundational Knowledge: literacy, numeracy, scientific literacy, information, communication and digital literacies, financial literacy and entrepreneurship, cultural identity, civic literacy and global citizenship
- Competencies: critical thinking and problem-solving, innovation and creativity, collaboration, and communication
- Character Qualities: discipline, integrity, self-directed learning, self-confidence, adaptability and resourcefulness, leadership, and responsible citizenship.

The JHS curriculum has been designed to ensure that learners are adequately equipped to transition seamlessly into SHS, where they will be equipped with the relevant knowledge, skills and competencies. The SHS curriculum emphasises character building, acquisition of 21st Century skills and competencies and nurturing core values within an environment of quality education to ensure the transition to further study, the world of work and adult life. This requires the delivery of robust secondary education that meets the varied learning needs of the youth in Ghana. The SHS curriculum, therefore, seeks to develop learners to become technology-inclined, scientifically literate, good problem-solvers who can think critically and creatively and are equipped to communicate with fluency, and possess the confidence and competence to participate fully in Ghanaian society as responsible local and global citizens – (referred to as 'Glocal citizens').

The SHS curriculum is driven by the nation's core values of truth, integrity, diversity, equity, discipline, self-directed learning, self-confidence, adaptability and resourcefulness, leadership, and responsible citizenship, and with the intent of achieving the Sustainable Development Goal 4: 'Inclusive, equitable quality education and life-long learning for all'. The following sections elaborate on the critical competencies required of every SHS learner:

Gender Equality and Social Inclusion (GESI)

- Appreciate their uniqueness about others.
- Pay attention to the uniqueness and unique needs of others.
- Value the perspective, experience, and opinion of others.
- Respect individuals of different beliefs, political views/ leanings, cultures, and religions.
- Embrace diversity and practise inclusion.
- Value and work in favour of a democratic and inclusive society.
- Be conscious of the existence of minority and disadvantaged groups in society and work to support them.
- Gain clarity about misconceptions/myths about gender, disability, ethnicity, age, religion, and all other excluded groups in society
- Interrogate and dispel their stereotypes and biases about gender and other disadvantaged and excluded groups in society.
- Appreciate the influence of socialisation in shaping social norms, roles, responsibilities, and mindsets.
- Identify injustice and advocate for change.
- Feel empowered to speak up for themselves and be a voice for other disadvantaged groups.

21st Century Skills and Competencies

In today's fast-changing world, high school graduates must be prepared for the 21st Century world of work. The study of Mathematics, Science, and Language Arts alone is no longer enough. High school graduates need a variety of skills and competencies to adapt to the global economy. Critical thinking, creativity, collaboration, communication, information literacy, media literacy, technology literacy, flexibility, leadership, initiative, productivity, and social skills are needed. These skills help learners to keep up with today's fast-paced job market. Employers want workers with more than academic knowledge. The 21st Century skills and competencies help graduates navigate the complex and changing workplace. Also, these help them become active citizens who improve their communities. Acquisition of 21st Century skills in high school requires a change in pedagogy from the approach that has been prevalent in Ghana in recent years. Teachers should discourage and abandon rote memorisation and passive learning. Instead, they should encourage active learning, collaboration, and problem-solving, project-

based, inquiry-based, and other learner-centred pedagogy should be used. As well as aligning with global best practices, these approaches also seek to reconnect formal education in Ghana with values-based indigenous education and discovery-based learning which existed in Ghana in pre-colonial times. This is aligned with the 'glocal' nature of this curriculum, connecting with Ghana's past to create confident citizens who can engage effectively in a global world. Digitalisation, automation, technological advances and the changing nature of work globally mean that young people need a new set of skills, knowledge and competencies to succeed in this dynamic and globalised labour market.

Critical Thinking and Problem-Solving Competency

- Ability to question norms, practices, and opinions, to reflect on one's values, perceptions, and actions.
- Ability to use reasoning skills to come to a logical conclusion.
- Being able to consider different perspectives and points of view
- Respecting evidence and reasoning
- Not being stuck in one position
- Ability to take a position in a discourse
- The overarching ability to apply different problem-solving frameworks to complex problems and develop viable, inclusive, and equitable solution options that integrate the above-mentioned competencies, promote sustainable development,

Creativity

- Ability to identify and solve complex problems through creative thinking.
- Ability to generate new ideas and innovative solutions to old problems.
- Ability to demonstrate originality and flexibility in approaching tasks and challenges.
- Collaborating with others to develop and refine creative ideas
- Ability to incorporate feedback and criticism into the creative process
- Utilising technology and other resources to enhance creativity
- Demonstrating a willingness to take risks and experiment with new approaches
- Adapting to changing circumstances and further information to maintain creativity

- Integrating multiple perspectives and disciplines to foster creativity
- Ability to communicate creative ideas effectively to a variety of audiences

Collaboration

- Abilities to learn from others; to understand and respect the needs, perspectives, and actions of others (empathy)
- Ability to understand, relate to and be sensitive to others (empathic leadership)
- Ability to deal with conflicts in a group
- Ability to facilitate collaborative and participatory problem-solving
- Ability to work with others to achieve a common goal.
- Ability to engage in effective communication, active listening, and the ability to compromise.
- Ability to work in groups on projects and assignments.

Communication

- Know the specific literacy and language of the subjects studied
- Use language for academic purposes
- Communicate effectively and meaningfully in a Ghanaian Language and English Language
- Communicate confidently, ethically, and effectively in different social contexts.
- Communicate confidently and effectively to different participants in different contexts
- Ability to communicate effectively verbally, non-verbally and through writing.
- Demonstrate requisite personal and social skills that are consistent with changes in society
- Ability to express ideas clearly and persuasively, listen actively, and respond appropriately
- Ability to develop digital communication skills such as email etiquette and online collaboration.
- Ability to engage in public speaking, debate, and written communication.

Learning for Life

- Understand subject content and apply it in different contexts
- Apply mathematical and scientific concepts in daily life

- Demonstrate mastery of skills in literacy, numeracy, and digital literacy.
- Develop an inquiry-based approach to continual learning.
- Be able to understand higher-order concepts and corresponding underlying principles.
- Participate in the creative use of the expressive arts and engage in aesthetic appreciation.
- Use and apply a variety of digital technologies
- Be digitally literate with a strong understanding of ICT and be confident in its application.
- Be equipped with the necessary qualifications to gain access to further and higher education and the world of work and adult life
- Ability to apply knowledge practically in the workplace so that they are able to utilise theory by translating it into practice.
- Develop their abilities, gifts and talents to be able to play a meaningful role in the development of the country
- Be able to think critically and creatively, anticipate consequences, recognise opportunities and be risk-takers
- Ability to pursue self-directed learning with the desire to chart a path to become effective lifelong learners.
- Independent thinkers and doers who show initiative and take action.
- Ability to innovate and think creatively, building on their knowledge base so that they take risks to achieve new goals
- Ability to think critically and solve problems so that they become positive change agents at work, in further study and in their personal lives.
- Be motivated to adapt to the changing needs of society through self-evaluation and ongoing training
- Be able to establish and maintain innovative enterprises both individually and in collaboration with others.
- Be able to ethically prioritise economic values to ensure stability and autonomy
- Show flexibility and preparedness to deal with job mobility
- Be committed towards the improvement of their quality of life and that of others
- Feel empowered in decision-making processes at various levels e.g., personal, group, class, school, etc.

- Be able to seek and respond to assistance, guidance and/or support when needed.
- Ability to make and adhere to commitments.
- Adopt a healthy and active lifestyle and appreciate how to use leisure time well.
- Be enthusiastic, with the knowledge, understanding and skill that enable them to progress to tertiary level, the world of work and adult life.
- Ability to transition from school to the world of work or further study by applying knowledge, skills and attitudes in new situations.
- Be independent, have academic and communication skills such as clarity of expression (written and spoken), and the ability to support their arguments.
- Be innovative and understand the 21st Century skills and competencies and apply them to everyday life.

Global and Local (Glocal) Citizenship

- Appreciate and respect the Ghanaian identity, culture, and heritage
- Be conscious of current global issues and relate well with people from different cultures
- Act in favour of the common good, social cohesion and social justice
- Have the requisite personal and social skills to handle changes in society
- Appreciate the impact of globalisation on the society.
- Ability to be an honest global citizen displaying leadership skills and moral fortitude with an understanding of the wider world and how to enhance Ghana's standing.

Systems Thinking Competency

- Ability to recognise and understand relationships
- Ability to analyse complex systems
- Ability to think of how systems are embedded within different domains and different scales
- Ability to deal with uncertainty

Normative Competency

- Ability to understand and reflect on the norms and values that underlie one's actions

- Ability to negotiate values, principles, goals, and targets, in a context of conflicts of interests and trade-offs, uncertain knowledge and contradictions

Anticipatory Competency

- Ability to understand and evaluate multiple futures – possible, probable, and desirable
- Ability to create one's vision for the future.
- Ability to apply the precautionary principle
- Ability to assess the consequences of actions
- Ability to deal with risks and changes

Strategic Competency

- Ability to collectively develop and implement innovative actions that further a cause at the local level and beyond.
- Ability to understand the bigger picture and the implications of smaller actions on them

Self-Awareness Competency

- The ability to reflect on one's role in the local community and (global) society
- Ability to continually evaluate and further motivate one's actions
- Ability to deal with one's feelings and desires

Social Emotional Learning (SEL): Five Core Competencies with Examples

1. Self-Awareness

Understanding one's emotions, thoughts, and values and how they influence one's behaviour in various situations. This includes the ability to recognise one's strengths and weaknesses with a sense of confidence and purpose. For instance:

- *Integrating personal and social identities;*
- *Identifying personal, cultural, and linguistic assets;*
- *Identifying one's emotions;*
- *Demonstrating honesty and integrity;*
- *Connecting feelings, values, and thoughts;*

- *Examining prejudices and biases;*
- *Experiencing self-efficacy;*
- *Having a growth mindset;*
- *Developing interests and a sense of purpose;*

2. Self-Management

The capacity to control one's emotions, thoughts, and actions in a variety of situations and to realise one's ambitions. This includes delaying obtaining one's desires, dealing with stress, and feeling motivated and accountable for achieving personal and group goals. For instance:

- *Managing one's emotions;*
- *Identifying and utilising stress-management strategies;*
- *Demonstrating self-discipline and self-motivation;*
- *Setting personal and group goals;*
- *Using planning and organisation skills;*
- *Having the courage to take the initiative;*
- *Demonstrating personal and collective agency;*

3. Social Awareness

The capacity to comprehend and care for others regardless of their backgrounds, cultures, and circumstances. This includes caring for others, understanding larger historical and social norms for behaviour in different contexts, and recognising family, school, and community resources and supports. For instance:

- *Recognising others' strengths*
- *Demonstrating empathy and compassion*
- *Caring about others' feelings*
- *Understanding and expressing gratitude*
- *Recognising situational demands and opportunities*
- *Understanding how organisations and systems influence behaviour*

4. Relationship Skills

The capacity to establish and maintain healthy, beneficial relationships and adapt to various social situations and groups. This includes speaking clearly, listening attentively, collaborating, solving problems and resolving conflicts as a group,

adapting to diverse social and cultural demands and opportunities, taking the initiative, and asking for or offering assistance when necessary. For instance:

- *Communicating effectively;*
- *Building positive relationships;*
- *Demonstrating cultural competence;*
- *Working as a team to solve problems;*
- *Constructively resolving conflicts;*
- *Withstanding negative social pressure;*
- *Taking the initiative in groups;*
- *Seeking or assisting when needed;*
- *Advocating for the rights of others.*

5. Responsible Decision-Making

The capacity to make thoughtful and constructive decisions regarding acting and interacting with others in various situations. This includes weighing the pros and cons of various personal, social, and group well-being actions. For example:

- *Demonstrating curiosity and an open mind;*
- *Solving personal and social problems;*
- *Learning to make reasonable decisions after analysing information, data, and facts;*
- *Anticipating and evaluating the effects of one's actions;*
- *Recognising that critical thinking skills are applicable both inside and outside of the classroom;*
- *Reflecting on one's role in promoting personal, family, and community well-being;*
- *Evaluating personal, interpersonal, community, and institutional impacts*

Learning and Teaching Approaches

Learning and teaching should develop learners as self-directed and lifelong learners. Learners must be helped to build up deep learning skills and competencies to develop the ability to acquire, integrate and apply knowledge and skills to solve authentic and real-life problems. Learners need to be exposed to a variety of learning experiences to enable them to collaborate with others, construct meaning, plan, manage, and make choices and decisions about their learning. This will allow them to internalise newly acquired knowledge and skills and help them

to take ownership of their education. The 21st Century skills and competencies describe the relevant global and contextualised skills that the SHS curriculum is designed to help learners acquire in addition to the 4Rs (Reading, wRiting, aRithmetic and cReativity). These skills and competencies, as tools for learning and teaching and skills for life, will allow learners to become critical thinkers, problem-solvers, creators, innovators, good communicators, collaborators, digitally literate, and culturally and globally sensitive citizens who are life-long learners with a keen interest in their personal development and contributing to national development.

Given the diverse needs of learners, teachers need to have a thorough grasp of the different pedagogies as they design and enact meaningful learning experiences to meet the needs of different learners in the classroom. The teaching-learning techniques and strategies should include practical activities, discussion, investigation, role play, problem-based, context-based, and project-based learning. Active learning strategies have become increasingly popular in education as they provide learners with meaningful opportunities to engage with the material. These strategies emphasise the use of creative and inclusive pedagogies and learner-centred approaches anchored on authentic and enquiry-based learning, collaborative and cooperative learning, differentiated teaching and learning, holistic learning, and cross-disciplinary learning. They include experiential learning, problem-based learning, project-based learning, and talk-for-learning approaches. Some of the pedagogical exemplars to guide learning and teaching of the SHS curriculum include:

- **Experiential Learning:** Experiential learning is a hands-on approach to learning that involves learners in real-world experiences. This approach focuses on the process of learning rather than the result. Learners are encouraged to reflect on their experiences and use them to develop new skills and knowledge. Experiential learning can take many forms, including internships, service learning, and field trips. One of the main benefits of experiential learning is that it allows learners to apply what they have learned in the classroom to real-world situations. This can help them develop a deeper understanding of the material and make connections between different concepts. Additionally, experiential learning can help learners develop important skills such as critical thinking, problem-solving and communication.
- **Problem-Based Learning:** Problem-based learning is an approach that involves learners in solving real-world problems. Learners are presented with

a problem or scenario and are asked to work together to find a solution. This approach encourages learners to take an active role in their learning and helps them develop important skills such as critical thinking and problem-solving. One of the main benefits of problem-based learning is that it encourages learners to take ownership of their learning. By working together to solve problems, learners can develop important skills such as collaboration and communication. Additionally, problem-based learning can help learners develop a deeper understanding of the material as they apply it to real-world situations.

- **Project-Based Learning:** Project-based learning is a hands-on approach to learning that involves learners in creating a project or product. This approach allows learners to take an active role in their learning and encourages them to develop important skills such as critical thinking, problem-solving, collaboration, and communication. One of the main benefits of project-based learning is that it allows learners to apply what they have learned in the classroom to real-world situations. Additionally, project-based learning can help learners develop important skills from each other and develop a deeper understanding of the material.
- **Talk for Learning Approaches:** Talk for learning approaches (TfL) are a range of techniques and strategies that are used to encourage learners to talk by involving them in discussions and debates about the material they are learning. This approach encourages learners to take an active role in their learning and helps them develop important skills such as critical thinking, collaboration and communication and also makes them develop confidence. One of the main benefits of TfL is that it encourages learners to think deeply about the material they are learning. By engaging in discussions and debates, learners can develop a deeper understanding of the material and make connections between different concepts.
- **Initiating Talk for Learning:** Initiating talk for learning requires the use of strategies that would encourage learners to talk in class. It helps learners to talk and participate meaningfully and actively in the teaching and learning process. Apart from developing skills such as communication and critical thinking, it also helps learners to develop confidence. Some strategies for initiating talk among learners are Activity Ball; Think-Pair-Share; Always, Sometimes, Never True; Matching and Ordering of Cards.
- **Building on What Others Say:** Building on what others say is an approach that involves learners in listening to and responding to their classmates'

ideas. This approach encourages learners to take an active role in their learning and helps them develop important skills such as critical thinking and communication. One of the main benefits of building on what others say is that it encourages learners to think deeply about the material they are learning. By listening to their classmates' ideas, learners can develop a deeper understanding of the material and make connections between different concepts. Additionally, building on what others say can help learners develop important skills such as collaboration and reflection. Some of the strategies to encourage learners to build on what others say are brainstorming, concept cartoons, pyramid discussion, and 5 Whys, amongst others.

- **Managing Talk for Learning:** Managing talk for learning requires the use of various strategies to effectively coordinate what learners say in class. Effective communication is a crucial aspect of learning in the classroom. Teachers must manage talk to ensure that learners are engaged, learning, and on-task in meaningful and purposeful ways. Some strategies for managing learners' contributions are debates, think-pair-share, sage in the circle etc.
- **Structuring Talk for Learning:** One effective way to shape learners' contributions is to structure classroom discussions. Structured discussions provide a framework for learners to engage in meaningful dialogue and develop critical thinking skills. Teachers can structure discussions by providing clear guidelines, such as speaking one at a time, listening actively, and building on each other's ideas. One popular structured discussion technique is the "think-pair-share" method. In this method, learners think about a question or prompt individually, and then pair up with a partner to discuss their ideas. Finally, the pairs share their ideas with the whole class. This method encourages all learners to participate and ensures that everyone has a chance to share their thoughts. Another effective way to structure talk for learning is to use open-ended questions. Open-ended questions encourage learners to think deeply and critically about a topic. They also promote discussion and collaboration among learners. Teachers can use open-ended questions to guide classroom discussions and encourage learners to share their ideas and perspectives. Other strategies that can be used are Concept/Mind Mapping, "Know," "Want to Know," "Learned" (KWL); Participatory Feedback; and the 5 Whys.
- **Diamond Nine:** The Diamond Nine activity is a useful tool for managing talk for learning in the classroom. This activity involves ranking items or ideas in order of importance or relevance. Learners work in groups to arrange cards

or sticky notes with different ideas or concepts into a diamond shape, with the most important idea at the top and the least important at the bottom. The Diamond Nine activity encourages learners to think critically about a topic and prioritise their ideas. It also promotes collaboration and discussion among group members. Teachers can use this activity to introduce a new topic, review material, or assess student understanding.

- **Group Work/Collaborative Learning:** Group work or collaborative learning are effective strategies for managing talk for learning in the classroom. These strategies encourage learners to work together to solve problems, share ideas, and learn from each other. Group work and collaborative learning also promote communication and collaborative skills that are essential for success in the workplace and in life. To implement group work effectively, teachers must provide clear guidelines and expectations for group members. They should also monitor group work to ensure that all learners are participating and on-task. Teachers can also use group work as an opportunity to assess individual student understanding and participation.
- **Inquiry-Based Learning:** Learners explore and discover new information by asking questions and investigating.
- **Problem-Based Learning:** Learners are given real-world problems to solve and must use critical thinking and problem-solving skills.
- **Project-Based Learning:** Learners work on long-term projects that relate to real-world scenarios.
- **Flipped Classroom:** Learners watch lectures or instructional videos at home and complete assignments and activities in class.
- **Mastery-Based Learning:** Learners learn at their own pace and only move on to new material once they have mastered the current material.
- **Gamification:** Learning is turned into a game-like experience with points, rewards, and competition.

These strategies provide learners with opportunities to engage with the material in meaningful ways and develop important skills such as critical thinking, problem-solving, collaboration, and communication. By incorporating these strategies into their teaching, teachers can help learners develop a deeper understanding of the material and prepare them for success in the real world. Effective communication is essential for learning in the classroom. Teachers must manage talk to ensure that learners are engaged in learning and on-task. Strategies such as structuring

talk for learning, using Diamond Nine activities, and implementing group work/ collaborative learning can help teachers manage talk effectively and promote student learning and engagement. By implementing these strategies, teachers can create a positive and productive learning environment where all learners can succeed.

Universal Design for Learning (UDL) in the SHS Curriculum

The design of the curriculum uses UDL to ensure the creation of flexible learning environments that can accommodate a wide range of learner abilities, needs, and preferences. The curriculum is designed to provide multiple means of engagement, representation, and action and expression, so teachers can create a more inclusive and effective learning experience for all learners. UDL is beneficial for all learners, but it is particularly beneficial for learners needing special support and learners who may struggle with traditional teaching approaches. The integration of UDL in the pedagogy is aimed at making learning accessible to everyone and helping all learners reach their full potential. For instance, teachers need to:

- incorporate multiple means of representation into their pedagogy, such as using different types of media and materials to present information.
- provide learners with multiple means of action and expression, such as giving them options for how they can demonstrate their learning.
- consider incorporating multiple means of engagement into their choice of pedagogy, such as incorporating games or interactive activities to make learning more fun and engaging.

By doing these, teachers can help ensure that the curriculum is accessible and effective for all learners, regardless of their individual needs and abilities.

Curriculum and Assessment Design: Revised Bloom's Taxonomy and Webb's Depth of Knowledge

The design of this curriculum uses the revised Bloom's Taxonomy and Webb's Depth of Knowledge (DoK) as frameworks to design what to teach and assess.

The Revised Bloom's Taxonomy provides a framework for designing effective learning experiences. Understanding the different levels of learning, informed the creation of activities and assessments that challenge learners at the appropriate level and help them progress to higher levels of thinking. Additionally, the framework emphasises the importance of higher-order thinking skills, such

as analysis, evaluation, and creation, which are essential for success in today's complex and rapidly changing world. This framework is a valuable tool for educators who want to design effective learning experiences that challenge students at the appropriate level and help them develop higher-order thinking skills. By understanding the six levels of learning and incorporating them into their teaching, educators can help prepare students for success in the 21st century. The six hierarchical levels of the revised Bloom's Taxonomy are:

1. **Remember** – At the foundation is learners' ability to remember. That is retrieving knowledge from long-term memory. This level requires learners to recall concepts—identify, recall, and retrieve information. Remembering is comprised of identifying, listing, and describing. Retrieving relevant knowledge from long-term memory includes, recognising, and recalling is critical for this level.
2. **Understand** – At understanding, learners are required to construct meaning that can be shown through clarification, paraphrasing, representing, comparing, contrasting and the ability to predict. This level requires interpretation, demonstration, and classification. Learners explain and interpret concepts at this level.
3. **Apply** – This level requires learners' ability to carry out procedures at the right time in a given situation. This level requires the application of knowledge to novel situations as well as executing, implementing, and solving problems. To apply, learners must solve multi-step problems.
4. **Analyse** – The ability to break things down into their parts and determine relationships between those parts and being able to tell the difference between what is relevant and irrelevant. At this level, information is deconstructed, and its relationships are understood. Comparing and contrasting information and organising it is key. Breaking material into its constituent parts and detecting how the parts relate to one another and an overall structure or purpose is required. The analysis also includes differentiating, organising and attributing.
5. **Evaluate** – The ability to make judgments based on criteria. To check whether there are fallacies and inconsistencies. This level involves information evaluation, critique, examination, and formulation of hypotheses.
6. **Create** – The ability to design a project or an experiment. To create, entails learners bringing something new. This level requires generating information—planning, designing, and constructing.

Webb's Depth of Knowledge (DoK) is a framework that helps educators and learners understand the level of cognitive engagement required for different types of learning tasks. The framework includes four levels. By understanding the four DoK levels, educators can design learning activities that challenge students to engage in deeper thinking and problem-solving. DoK is an essential tool for designing effective instruction and assessments. By understanding the different levels of DoK, teachers can design instruction and assessments that align with what they intend to achieve. DoK is a useful tool for differentiating instruction and providing appropriate challenges for all learners. Teachers can use DoK to identify students who need additional support or those who are ready for more advanced tasks. The four levels of Webb's' DoK assessment framework are:

- **Level 1: Recall and Reproduction** – Assessment at this level is on recall of facts, concepts, information, and procedures—this involves basic knowledge acquisition. Learners are asked specific questions to launch activities, exercises, and assessments. The assessment is focused on recollection and reproduction.
- **Level 2: Skills of Conceptual Understanding** – Assessment at this level goes beyond simple recall to include making connections between pieces of information. The learner's application of skills and concepts is assessed. The assessment task is focused more on the use of information to solve multi-step problems. A learner is required to make decisions about how to apply facts and details provided to them.
- **Level 3: Strategic Reasoning** – At this level, the learner's strategic thinking and reasoning which is abstract and complex is assessed. The assessment task requires learners to analyse and evaluate composite real-world problems with predictable outcomes. A learner must apply logic, employ problem-solving strategies, and use skills from multiple subject areas to generate solutions. Multitasking is expected of learners at this level.
- **Level 4: Extended Critical Thinking and Reasoning** – At this level of assessment, the learner's extended thinking to solve complex and authentic problems with unpredictable outcomes is the goal. The learner must be able to strategically analyse, investigate, and reflect while working to solve a problem, or changing their approach to accommodate new information. The assessment requires sophisticated and creative thinking. As part of this assessment, the learner must know how to evaluate their progress and determine whether they are on track to a feasible solution for themselves.

The main distinction between these two conceptual frameworks is what is measured. The revised Bloom's Taxonomy assesses the cognitive level that learners must demonstrate as evidence that a learning experience occurred. The DoK, on the other hand, is focused on the context—the scenario, setting, or situation—in which learners should express their learning. In this curriculum, the revised Bloom's taxonomy guided the design, and the DoK is used to guide the assessment of learning. The taxonomy provides the instructional framework, and the DoK analyses the assignment specifics. It is important to note that Bloom's Taxonomy requires learners to master the lower levels before progressing to the next. So, suppose the goal is to apply a mathematical formula. In that case, they must first be able to identify that formula and its primary purpose (remember and understand). The cognitive rigour is therefore presented in incremental steps to demonstrate the learning progression. When measuring assessments in DoK, learners move fluidly through all levels. In the same example, while solving a problem with a formula, learners recall the formula (DoK 1) to solve the problem (DoK 2 and DoK 3). Depending on the difficulty of the problem to be solved, the learner may progress to DoK 4.

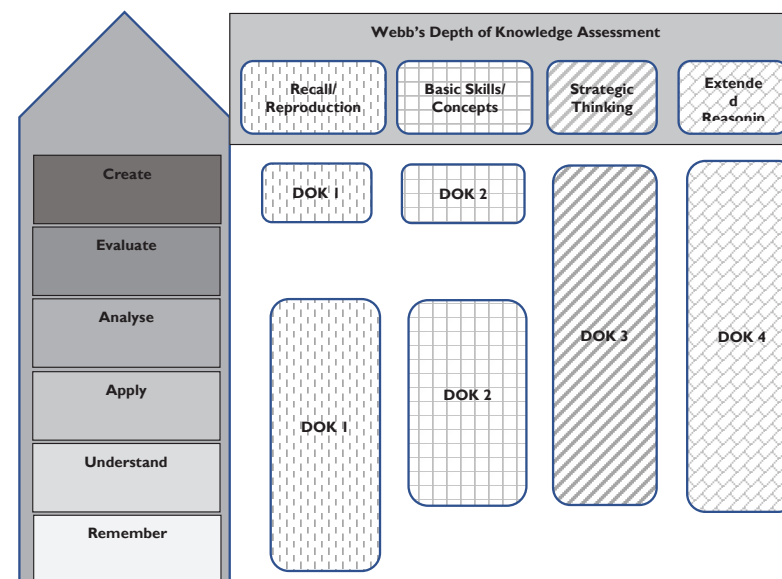

Figure 1: Revised Bloom Taxonomy combined with Webb's Depth of Knowledge for Teaching and Assessment

The structure of teaching and the assessment should align with the six levels of Bloom's knowledge hierarchy and DoK shown in Figure 1. Each level of DoK

should be used to assess specific domains of Bloom's Taxonomy as illustrated in the table below:

Depth of Knowledge (DoK) Assessment	Bloom's Taxonomy applied to DoK
• Level 1: Recall and Reproduction	• Remembering, Understanding, Application, Analysis and Creation
• Level 2: Basic Skills and Concepts	• Understanding, Application, Analysis and Creation
• Level 3: Strategic Thinking	• Understanding, Application, Analysis, Evaluation and Creation
• Level 4: Extended Reasoning	• Understanding, Application, Analysis, Evaluation and Creation

In line with the National Pre-Tertiary Learning and Assessment Framework, the Secondary Education Assessment Guide (SEAG) requires that classroom assessments should cover **Assessment as learning (AaL)**, **Assessment of learning (AoL)** and **Assessment for learning (AfL)**. Therefore, teachers should align the Revised Bloom's Taxonomy with the DoK framework of assessment. Formative assessments should include classroom discussions, project-based assignments, and self-reflection exercises, while summative assessments should include standardised tests and rubric-based evaluations of learners' work. It is important to seek feedback from learners themselves, as they may have unique insights into how well they are developing these skills in the classroom.

To assess 21st Century skills and competencies in the classroom, teachers will have to use a combination of both formative and summative assessments to evaluate learners' acquisition of these skills and competencies. For instance:

- Identify the specific 21st Century skills and competencies to be assessed. For instance, you might want to assess *critical thinking, problem-solving, or creativity*.
- Align the skills and competencies with the DoK levels. For example, lower DoK levels might be more appropriate for assessing basic knowledge and

comprehension, whereas higher DoK levels might be more appropriate for assessing more complex skills such as *analysis, synthesis, and evaluation*.

- Develop assessment items that align with the DoK levels and the skills and competencies you want to assess. These items should be designed to elicit evidence of learning across the different levels of the DoK framework.
- Administer the assessment and collect data. Analyse the data to gain insights into student learning and identify areas where learners may need additional support or instruction.

The DoK framework is a powerful tool for assessing the acquisition of 21st Century skills and competencies in the classroom, helping teachers to better understand how learners are learning and identify areas for improvement.

Educational success is no longer about producing content knowledge, but rather about extrapolating from what we know and applying the knowledge creatively in new situations.

The overall assessment of learning at SHS should be aligned with the National Pre-Tertiary Learning and Assessment Framework and the Secondary Education Assessment Guide. Formative and summative assessment strategies must be used.

Definition of Key Terms and Concepts in the Curriculum

- **Learning Outcomes:** It is a statement that defines the knowledge, skills, and abilities that learners should possess and be able to demonstrate after completing a learning experience. They are specific, measurable, attainable, and aligned with the content standards of the curriculum. It helps the teachers to determine what to teach, how to teach, and how to assess learning. Also, it communicates expectations to learners and helps them to better master the subject.
- **Learning Indicators:** They are measures that allow teachers to observe progress in the development of capacities and skills. They provide a simple and reliable means to evaluate the quality and efficacy of teaching practices, content delivery, and attainment of learning outcomes.
- **Content Standards:** It is a statement that defines the knowledge, skills, and understanding that learners are expected to learn in a particular subject area or grade level. They provide a clear target for learners and teachers and help focus resources on learner achievement.
- **Pedagogical Exemplars:** They are teaching examples used to convey values and standards to learners. Pedagogical Exemplars are usually demonstrated through teacher behaviour.
- **Assessment:** It is the systematic collection and analysis of data about learners' learning to improve the learning process or make a judgement on learner achievement levels. Assessment is aimed at developing a deep understanding of what learners know, understand, and can do with their knowledge because of their educational experiences. Assessment involves the use of empirical data on learners' learning to improve learning. Assessment is an essential aspect of the teaching and learning process in education, which enables teachers to assess the effectiveness of their teaching by linking learner performance to specific learning outcomes.
- **Teaching and Learning Resources:** Teaching and learning resources are essential tools for teachers to provide high-quality education to their learners. These resources can take various forms, including textbooks, audiovisual materials, online resources, and educational software. It is also important to avoid stereotypes and use inclusive language in teaching and learning resources. This means avoiding language that reinforces negative stereotypes and using language that is respectful and inclusive of all individuals regardless of their background. Using a consistent tone, style, and design is very important.

PHILOSOPHY, VISION AND GOAL OF CLOTHING AND TEXTILES

Philosophy

The next generation of Clothing and Textiles professionals will be empowered through observation, curiosity, innovation and exposure to practically related concepts and opportunities that leverage hands-on activities. Emphasis will be placed on the creative use and application of scientific principles in textile science, garment construction, fashion design and sustainable clothing practices within a learner-centred environment. This approach aims to prepare individuals for further education and/or seamless transition into the world of work.

Vision

A learner equipped with skills and competencies to create innovative clothing designs, develop textile products, establish and manage fashion industries that contribute meaningfully to the socio-economic development of Ghana.

Goal

To equip learners with 21st-century skills, competencies, knowledge, values and attitudes needed for further educational pursuits, world of work and adult life in the clothing and textiles industry.

Contextual issues

Potential Barriers	Possible Solutions
Content overload	Topics have been merged to reduce repetition and content overload. The focus is now on essential and relevant areas, with more emphasis on practical learning.
Inappropriate teaching methods and assessment strategies	Encourage the use of creative and gender-responsive teaching and assessment methods. These should support assessment *for learning*, *as learning* and *of learning* to guide effective teaching.

Potential Barriers	Possible Solutions
Limited ICT integration in teaching	Include ICT tools training in Continuous Professional Development (CPD) sessions. Teachers are encouraged to use pre-recorded videos, YouTube and Open Educational Resources (OER) to support teaching.
Lack of laboratories, equipment and materials for practical work	Teachers should identify and use local tools, materials and nearby industries to support practical lessons. Digital tools such as videos and OER can also supplement practical learning.
Misconception that Clothing and Textiles is for low academic achievers and females only	Apply Gender Equality and Social Inclusion (GESI) strategies to promote awareness using role models and case studies that highlight achievements in Clothing and Textiles across genders.

Rationale

Clothing and Textiles focuses on the individual, the family and their interaction with the environment through dress, personal appearance and textile use. It promotes enquiry, critical thinking, decision making and practical action to meet physical, emotional, social and cultural needs related to clothing. The subject helps learners respond creatively to everyday situations in a changing society, aiming to enhance quality of life. It also develops creative thinking, problem-solving abilities and practical skills needed for personal use, further studies or careers in the clothing and fashion industry.

YEAR ONE

Subject CLOTHING AND TEXTILES
Strand I. PSYCHOSOCIAL ASPECT OF CLOTHING
Sub-Strand I. UNDERSTANDING CONCEPTS AND PRINCIPLES OF CLOTHING

Learning Outcomes	21 st Century Skills and Competencies	GESI ¹ , SEL ² and Shared National Values
I.I.I.LO.I		
Select and use clothing suitable for various occasions.	Communication and Collaboration Skills: Able to listen to peers and ask relevant questions based on what they heard. Learning from contributing to the learning of others. Able to adapt their presentation to better engage the audience during its delivery. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Digital Literacy: Able to use ICT tools to surf for relevant information confidently. Digital literacy will be used in class presentation. Ability to create simple video and audio recordings. Ability to explore print and electronic media information. Critical thinking and Problem-solving skills: Ability to use justifiable methods to choose between the options that they have created. Apply knowledge to real life situations in the use of clothes. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Apply their knowledge or make connections with what they learn in real life situations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/ myths about gender as they relate clothing selection, care and maintenance. • Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in clothing selection, care and maintenance. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective management and maintenance of clothing. SEL: Learners having been given the opportunity to experience varied teaching

¹ Gender Equality and Social Inclusion

² Socio-Emotional Learning

	Personal development and leadership skills: Able to articulate and explain their feelings in a group situation and working with others. Cultural identity and global citizenship: Awareness cultural significance of wearing clothes.	approaches in an enabling environment will be equipped with social emotional learning skills to: • Build self-confidence. • Practice and identify how others may be feeling about their choice of clothing. Reflect on positive and negative consequences of their choice of clothing for occasions. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility
I.I.I.LO.2		
Apply knowledge and understanding of clothing care techniques and skills in interpreting care labels to ensure the proper maintenance and longevity of clothing.	Communication and Collaboration Skills: Able to listen to peers and ask relevant questions based on what they heard. Learning from and contributing to the learning of others. Able to adapt their presentation to better engage the audience during its delivery. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Digital Literacy: Able to use ICT tools to surf for relevant information confidently. Digital literacy will be used in class presentation. Ability to create simple video and audio recordings. Ability to explore print and electronic media for information.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in clothing care and maintenance.

	Critical thinking and Problem-solving skills: Ability to use justifiable methods to choose between the options that they have created. Apply knowledge to real life situations in the care and maintenance of clothing. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Apply their knowledge or make connections with what they learn in real life situations. Personal development and leadership skills: Able to articulate and explain their feelings in a group situation and working with others. Cultural identity and global citizenship: Awareness of cultural significance of caring for and maintaining clothing.	• Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective management and maintenance of clothing. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build self-confidence. • Practice and identify how others may be feeling about their choice of clothing. • Reflect on the essence of caring for and maintaining clothing. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.I.I.CS.I	I.I.I.LI.I	I.I.I.AS.I
Demonstrate knowledge and understanding of the concept of clothing, reasons for wearing clothes, care, and maintenance.	Explain the concept of clothing. Talk for Learning Approaches: Brainstorm/Brain-write to explore on the meaning of clothing. Using the responses from brainstorming, come up with the correct meaning of clothing. <i>Note: encourage all learners to participate, share and accept each other's views respectfully.</i> E.g., Clothing is anything worn or carried on the body to modify personal appearance. Structured Talk for Learning: Observe realia/charts/pictures/video of different types of clothing, list and describe each one and possibly say their uses to aid understanding.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.I.I.LI.2	I.I.I.AS.2
	Classify clothes under various categories. Group work: In groups, learners surf the internet, text and other sources to identify the various classifications of clothing and present it in class. E.g. Classification as: • Under/foundation garment – corsets, panty girdle, panties, brassier, boxers, singlet, etc. • Inner garment – shirts, blouse, etc. (a shirt/blouse becomes an inner garment when a coat is worn over it). • Outer garment - Shirt, blouse, T-shirt, jackets, dress, slit and kaba, etc. • Casual/informal - T-shirt, shorts, trousers, blouse, jackets, dress, etc. • Formal/Occasional wear – Suit, Smock, Slit and Kaba, Kaftan, (all these can be worn to some of these events: wedding, dinner, church, mosque, festivals and workplaces, etc).	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	<i>Note: Learners use different ways/modes of presentations such as: oral presentations, audio and video productions, photographic essays, simulations, or skits.</i>		
	I.I.I.LI.3		I.I.I.AS.3
	Discuss the reasons for wearing clothes. Talk for Learning Approaches: Use think-pair-share/mingling; discuss reasons for wearing clothes using sticky notes/A4 sheet/exercise books/jotters to present your responses. E.g., Protection Adornment, Mood expression. Structured talk for learning: Use realia, pictures or charts, posters, power point presentation to depict reasons for wearing clothes for whole class discussion.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Flip charts • Pictures • Sticky notes	• Realia of clothing • Computer • Projector	• Smart phones (if possible). • Videos, etc.

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.1.1.CS.2	I.1.1.LI.1	I.1.1.AS.1
Demonstrate knowledge and understanding to analyse care label information on various techniques for maintaining garments quality.	Analyse various ways/techniques for caring and maintaining clothing. Talk for Learning: Share personal experiences on how to care for clothes. Use the think-square-share method to identify the various ways/techniques for caring and maintaining clothing (using sticky notes/A4 sheet/exercise books/jotters). E.g., Washing, ironing, mending, proper storage. Encourage learners to respect each other's views on the various ways of caring and maintaining clothing based on their cultural background, etc. Group Work: In mixed ability/gender groups, analyse the pros and cons of the various ways/techniques for caring and maintaining clothing and present it in class using charts/pictures/power point presentation/concept map, etc. <i>Note: Stress the value of responsibility and cleanliness in maintaining clothes.</i>	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning.
	I.1.1.LI.2	I.1.1.AS.2
	Analyse information on clothing care labels. Talk for Learning: Share personal experiences on how you laundered your clothes without considering care labels attached to your clothes. Use the think-pair-share method to identify care notes on various articles. Group Work: In mixed ability/gender groups, analyse the pros and cons of attaching care labels/notes/tags to clothing articles and present it in class using charts/pictures/power point presentation/concept map, etc. Encourage learners to respect each other's views during group presentations.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	I.1.1.LI.3 Discuss the importance of good clothing care labels. Talk for Learning Approaches: Use think-pair-share/mingling; discuss the importance of good care labels using sticky notes/A4 sheet/exercise books/jotters to present your responses. E.g. • maintain cleanliness of clothing and the body • prolong the use of clothing • prevent infections on the skin and hair, etc. Structured talk for learning: Use realia, pictures or charts, posters, power point presentation to depict good care habits for whole class discussion. <i>Note: Stress the need to read care labels/notes/tags on clothing articles before laundering</i>	I.1.1.AS.3 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Flip charts • Pictures • Sticky notes	• Realia of clothing • Computer • Projector
		• Smart phones (if possible). • Videos, etc.

Subject CLOTHING AND TEXTILES
Strand 1. PSYCHOSOCIAL ASPECT OF CLOTHING
Sub-Strand 2. WARDROBE PLANNING AND APPEARANCE MANAGEMENT PRACTICES

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
I.1.2.LO.1		
Apply knowledge and understanding of wardrobe planning principles to plan wardrobe for individuals and families to meet their clothing needs.	Communication and Collaboration Skills: Able to listen to peers and ask relevant questions based on what they heard. Learning from and contributing to the learning of others. Able to adapt their presentation to better engage the audience during its delivery. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Digital Literacy: Able to use ICT tools to surf for relevant information confidently. Digital literacy will be used in class presentation. Ability to create simple video and audio recordings. Ability to explore print and electronic media for information. Critical thinking and Problem-solving skills: Ability to use justifiable methods to choose between the options that they have created. Apply knowledge to real life situations in the care and maintenance of clothing. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Apply their knowledge or make connections with what they learn in real life situations. Personal development and leadership skills: Able to articulate and explain their feelings in a group situation and working with others. Cultural identity and global citizenship: Awareness of cultural significance of caring for and maintaining clothing.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: Respect individuals of different SEL: • Backgrounds. • Embrace diversity and practice inclusion. • Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in clothing care and maintenance. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective management and maintenance of clothing. • Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build self-confidence. • Practice and identify how others may be feeling about their choice of clothing.

		• Reflect on the essence of caring for and maintaining clothing. National Values: Tolerance Friendliness Open mindedness Patience Hard work Humility, etc.
I.1.2.LO.2		
Apply knowledge and principles of good grooming to promote appearance management skills among individuals, families and societal dress sense.	Communication and Collaboration Skills: Assume shared responsibility and give feedback. Able to speak clearly and share ideas using positive language. Able to engage the audience with different presentation techniques. Critical Thinking and Problem-Solving: Apply their knowledge or make connections with what they learn in real life situations. Apply their knowledge in real life situations. Creativity and Innovation Skills: Doing things in new ways that extend learners' learning outside the classroom. Exhibit ability to generate multiple ideas when they are given a stimulus or initial idea as starting point. Personal Development and Leadership Skills: Ability to contribute to team discussions to reach a consensus on what action should be undertaken. Digital Literacy: Ability to create slides and present using PowerPoint. Ability to employ different ICT tools to search for OERs. Expressing ideas using print and electronic media. Ability to analyse electronic information to aid understanding and self-directed learning.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing of knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about clothing selection. • Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in good grooming. • Identify injustice, especially in recognition of the contributions of different groups and individuals to plan wardrobe for effective good grooming. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to:

	Cultural Identity and Global Citizenship: Being informed about the needs of the family, school and community.	• Build self-confidence. • Practice and identify how others may be feeling about their choice of clothing. • Reflect on positive and negative consequences of their choice of clothing for occasions. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
--	---	--

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.1.2.CS.1	I.1.2.LI.1	I.1.2.AS.1
Demonstrate the ability to apply knowledge and understanding of wardrobe planning principles to plan suitable wardrobes for individuals and families.	Discuss wardrobe planning and its importance in clothing management. Managing Talk for Learning Approaches: Use the KWL approach and write about what they know and what they want to know about planning a wardrobe. Collaborative Learning Talk for Learning Approaches: In pairs/groups, think-pair-share/Brainstorm to explain the terms wardrobe and wardrobe planning. E.g. A wardrobe is a collection of clothes, accessories and cosmetics. Wardrobe planning: The process of selecting clothes, accessories and cosmetics that are in style and good in design and appropriate for present and future use. Group Work: In mixed gender/ability/cultural groups, use pyramid discussion/mingling, explore factors to consider when planning wardrobe. E.g. • Existing wardrobe • Climate • Age • Money available • Status or lifestyle, etc. <i>Note: Emphasise the values of responsibility and self-esteem in wardrobe planning.</i>	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.1.2.LI.2	I.1.2.AS.2
	Plan a wardrobe to support individuals and families achieve their clothing needs and personal identity. Collaborative Learning/Talk for Learning Approaches: In pairs/groups, use talking point to describe how to select and arrange clothing when planning a wardrobe. Group Work/Collaborative Learning Approaches: In mixed ability/gender/random groups, plan wardrobe for specific groups of individuals and follow-up with whole class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Experiential Learning Approaches: In groups, surf the internet/watch video to find out how to plan a wardrobe and present the findings. Role-play how a wardrobe is planned using the appropriate clothing items. Ensure respect for self and others when role playing. Talk for Learning Approaches: Use the radio presenter strategy to share learning experiences to complete the KWL by stating what they learnt in the lesson. Give differentiated tasks to encourage scaffolding of ideas among all learners.			
Teaching and Learning Materials	• Flip charts • Pictures • Sticky notes	• Realia of clothing • Computer, Cameras, Projector and Smart phones (if possible). • Videos, Charts, Posters of well-planned and labelled wardrobe and real examples of items used in wardrobe planning.	• Pictures of well-groomed persons • Surf internet • Clothing items, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.1.2.CS. 2	I.1.2.LI.1	I.1.2.AS.1
Analyse how to apply knowledge and principles of good grooming to promote appearance management skills, dress sense and personal identity building.	Explain good grooming in relation to dress sense. Managing Talk for Learning/collaborative Learning Approaches: In pairs, brainstorm/Brain-write to review the concept good grooming learnt in Career Technology at the JHS level. Whole class/panel/group discussion on what good grooming entails. <i>Note: Emphasise the need to dress appropriately to enhance self-image.</i> Learners should be guided in their presentations to promote respect, tolerance and integration of social and cultural issues.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.1.2.LI.2	I.1.2.AS.2
	Examine the factors that promote good grooming. Group work/Problem based Approaches: In mixed gender /random groups, discuss the factors that promote good grooming E.g. • Posture • Diet • Exercise, rest and relaxation • clothing • personal and environmental hygiene, etc. Collaborative learning/Group work: In mixed ability/cultural groups, examine how the factors promote good grooming (using Flip charts, pictures, sticky notes, realia of clothing, surf internet, smart phones (if possible)). Experiential Learning Approaches: Undertake a case study on good grooming in relation to the factors by observing persons of your choice in the school and community (using note pads, smart phones (if possible) cameras, etc.) to collect data and present a report. Use differentiated tasks to cater for the learning needs of all learners (male, female, and SEN learners).	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

Teaching and Learning Materials	• Flip charts • Pictures • Sticky notes	• Realia of clothing • Computer, Cameras, Projector and Smart phones (if possible). • Videos, Charts, Posters of well-planned and labelled wardrobe and real examples of items used in wardrobe planning.	• Pictures of well-groomed persons • Surf internet • Clothing items, etc.

Strand 2. **TEXTILES IN CLOTHING**
Sub-Strand 1. **CHARACTERISTICS OF FIBRES AND FABRICS FUNCTIONALITY**

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
1.2.1.LO.1		
Apply knowledge, understanding of fibres to identify and describe the characteristics of different types of fibres and fabrics.	Critical Thinking and Problem-Solving: Able to identify sources/classifications of fibres using realia. Able to choose between the options that they have created and use some justifiable method to do so. Communication and Collaboration Skills: Learn from and contribute to the learning of others and give constructive feedback. Assume shared responsibility and cooperate in different groups. Digital Literacy: Teamwork using diverse ICT tools. Can analyse videos to understand scientific principles. Critical Thinking and Problem-Solving Skills: Making reasoned judgments and conclusions.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/ myths about gender as they relate to clothing construction. Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in clothing construction. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Identify and express their feelings about fibres and clothing construction. • Appreciate the different types of fibres and how they are used. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.

I.2. I. LO.2		
Analyse the functional properties of fibres and fabrics in relation to their uses.	Critical Thinking and Problem-Solving: Able to identify sources/classifications of fibres using realia. I.2. I.CS.1	I.2.I.LI.1	I.2.I.AS.1
Demonstrate scientific knowledge and understanding to identify and describe the characteristics of different types of fibres and fabrics.	Classify fibres into natural and synthetic categories and describe their characteristics. Group work/Collaborative Learning Approaches: In mixed ability/gender groups, review and present the meaning and sources/classification of fibres learnt in J.H.S. to explain fibres. E.g. Fibre is any substance natural or manufactured, which is fine and flexible and can be processed into fabric. Experiential Learning/Group Work: Classification of fibres according to sources: natural and man- made fibres. E.g. Natural: • Animal, Plant and mineral Man-made: • Regenerated, synthetic and inorganic Structured Talk for Learning /Experiential Learning Approaches: Provide samples/charts/videos/posters/ of fibres for learners to identify. E.g. Natural and man-made fibres. With the aid of samples/charts/videos/posters on fibres: Discuss the characteristics of different fibres. Explain the difference between natural and synthetic fibres using charts or slides.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.2.I.LI.2	I.2.I.AS.2
	Apply scientific principles to test for the characteristics of fibres. Structured talk for Learning/Problem based Learning Approaches: With the aid of realia/charts/videos/posters on fibres, discuss the various ways of testing for the characteristics of fibres. E.g., • Visual test • Burning test • Chemical test • Absorbency test, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Group Work: In mixed ability groups, learners test for the characteristics of fibres using at least two of the methods. Groups present report on the experiment for whole class discussion.		
Teaching and Learning Materials	• Flipcharts • Pictures Sticky notes • Realia of fibres and clothing	• Surf internet • Smart phones (if possible) • Computers, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI		Assessment
I.2. I.CS.2	I.2.I.LI.1		I.2.I.AS.1
Demonstrate ability to analyse the functional properties of fibres and fabrics and their application in clothing and household textiles.	Investigate the absorbency, durability and elasticity of different fabric types through simple experiments. Group work/Collaborative Learning Approaches: In mixed ability/gender groups, conduct simple experiments to test absorbency, durability and elasticity of different fabric types: E.g. • Absorbency test • Durability test • Elasticity test, etc. Record the observations and discuss your findings. Structured Talk for Learning /Experiential Learning Approaches: Provide samples/charts/videos/posters/ of fibres for learners to identify. E.g. Natural and man-made fibres. With the aid of samples/charts/videos/posters on fibres, discuss the characteristics of different fibres.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.2.I.LI.2		I.2.I.AS.2
	Explain how the properties of fibres influence the selection of fabrics for specific purposes. Structured talk for Learning/Problem based Learning Approaches: Analyse real-life scenarios to determine the best fabric for specific uses E.g. • Sportswear • Baby clothes • Curtains • Bed sheets, etc. Group Work: In mixed ability groups, organise a group activity to match different fabric types to their suitable uses based on properties. Groups present report for whole class discussion.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

1.2.2.CS.1	1.2.2.LI.1	1.2.2.AS.1
Demonstrate knowledge and understanding of different fibres and fabrics used in clothing construction.	Categorise and relate fibres to fabrics used in garment making. Group work/Collaborative Learning Approaches: In mixed ability/gender groups, use think-pair-share to discuss the types of clothes you wear daily and what makes them comfortable or suitable for different weather conditions. Display various fabric samples and ask learners to describe their texture, weight, and appearance. Experiential Learning/Group Work: Explain the classification of fibres and their use in fabric production E.g. • Natural • Synthetic, etc. Structured Talk for Learning /Experiential Learning Approaches: Use charts and samples to illustrate different fabric types: • Cotton • Linen • Silk • Wool • Polyester, etc. Visit dressmaking shops to collect pieces of fabrics and sort the fabrics based on fibre origin.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	1.2.2.LI.2	1.2.2.AS.2
	Examine the properties of common fabrics and how they influence fabric selection for different clothing styles. Structured talk for Learning/Problem based Learning Approaches: With the aid of realia/charts/videos/posters on fibres, discuss the properties of common fabrics. E.g., • Soft and comfortable to wear • Highly absorbent and breathable • Strong and durable	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Wrinkles easily but can be blended to reduce creasing • Shrinks after the first wash if not pre-treated, etc. Group Work: In mixed ability groups/gender groups, identify the uses of different fabrics. • Cotton: Everyday clothing such as T-shirts, dresses, undergarments, bedsheets and towels. • Linen: Tablecloths, curtains and upholstery • Wool: Sweaters, coats, scarves, blankets and carpets • Polyester: Sportswear, uniforms, outerwear, upholstery and home furnishings, etc. Groups present report for whole class discussion.	
Teaching and Learning Materials	• Flip charts • Pictures Sticky notes • Realia of clothing Surf internet • Cameras, Computers and Smart phones (if possible), etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
1.2.2.CS.2	1.2.2.LI.1	1.2.2.AS.1
Demonstrate ability to analyse the relationship between fabric properties and their suitability for specific clothing designs.	Investigate the absorbency, durability and elasticity of different fabric types through simple experiments. Group work/Collaborative Learning Approaches: In mixed ability/gender groups, conduct hands-on activities to test properties of fabrics. E.g. • Absorbency • Strength • Stretchability • Drape, etc. Record the observations and discuss your findings. Structured Talk for Learning /Experiential Learning Approaches: Observe videos/Interview individuals to find out which fabrics are suitable for specific clothing types. E.g. • Cotton for casual wear • Silk for formal attire, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	1.2.2.LI.2	1.2.2.AS.2
	Evaluate the advantages and disadvantages of different fabrics in clothing construction. Structured talk for Learning/Problem-Based Learning Approaches: Observe images or real-life samples of garments made from different fabrics and discuss why specific fabrics were chosen. Group Work: In mixed ability/gender groups, organise a group project to match fabric samples to appropriate clothing styles based on function E.g. • School uniforms • Sportswear • Evening wear, etc. Groups present report for whole class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

Teaching and Learning Materials	• Flip charts • Pictures Sticky notes • Realia of clothing Surf internet • Cameras, Computers and Smart phones (if possible), etc.

Strand **3. CLOTHING AND TEXTILES PRODUCTION TECHNOLOGY**
Sub-Strand **1. CLOTHING CONSTRUCTION PROCESSES**

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
1.3.1.LO.1		
Identify and describe the functions of various sewing tools and equipment used in clothing construction.	Critical Thinking and Problem-solving skills: Think rationally and clearly to solve problems. Use open and closed questions to construct a conclusion or ending. Communication and collaboration skills: Learn from and contribute to the learning of others and give constructive feedback. Assume shared responsibility and cooperate in different groups. Digital Literacy: Teamwork using diverse ICT tools. Can analyse videos to understand scientific principles. Creativity and innovation: Ability to combine ideas and concepts to make new ones. Can merge simple ideas to create new ones and identify those ideas have different components. Personal development and Leadership skills: Able to articulate and explain one's feelings in a group situation and working with others.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths in clothing selection. • Interrogate their stereotypes and biases about gender and the role men, women and people with special needs play in the selection and production of clothing items. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Participate in decision-making related to classroom activities and rules. • Explore and apply different skills in clothing construction. • Offer positive support to each other. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.

1.3.1.LO.2		
Explain the importance of sewing notions and apply basic stitches in clothing construction.	Communication and collaboration skills: Understand and accept other people's perspectives. Able to follow a speaker and create their own meaning, probing questions to check and deepen their own understanding. Able to follow and take part in a group discussion and express opinions when called upon. Apply knowledge to real life situations by examining evidence to solve problems. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Can convey simple ideas or thoughts to a wider group, for example in a group discussion. Critical Thinking and Problem-solving skills: Think rationally and clearly to solve problems. Use open and closed questions to construct a conclusion or ending. Digital literacy: Can confidently prepare presentation using ICT and respecting other people's privacy. Share information among team members using social media ethically. Ability to search and share digital information. Ability to type presentations and reports.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Interrogate their stereotypes and biases about gender and the role men, women and people with special needs play in the selection and production of clothing items. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Participate in decision-making related to classroom activities and rules. • Explore and apply different skills in clothing construction. • Offer positive support to each other.

1.3.1.LO.3	Critical Thinking and Problem-solving skills: Think rationally and clearly to solve problems. Use open and closed questions to construct a conclusion or ending. Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
1.3.1.CS.1	1.3.1.LI.1	1.3.1.AS.1
Demonstrate knowledge, understanding and skills of handling sewing tools and equipment.	Classify sewing tools into measuring, cutting, marking and stitching tools. Talk for Learning/Collaborative Learning Approaches: In pairs/groups, use think-pair- share/shower thought/brainstorming to discuss tools, equipment and materials (sewing supplies) for clothing construction. Group Work: In mixed ability/gender/random groups, discuss and classify the various sewing tools and equipment according their uses and functions in the sewing industry. Groups present their reports for whole class discussion using different presentation modes. E.g. • Measuring tools: Tape measure, ruler and seam gauge. • Cutting tools: Scissors, shears and rotary cutter. • Marking tools: Tailor’s chalk, tracing wheel and fabric markers. • Sewing tools: Needles, pins, thimbles and sewing machines, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	1.3.1.LI.2	1.3.1.AS.2
	Demonstrate appropriate handling and maintenance of sewing tools and equipment. Experiential Learning/Group Work. In pairs/ mixed ability groups, observe demonstration/videos or charts and identify the proper handling and maintenance of tools and equipment. Individually/ in pairs, practice measuring, marking and cutting fabric using the correct tools. Monitor groups during practice to support learners when necessary.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	I.3.1.LI.3		I.3.1.AS.3	
	Compare hand sewing and machine sewing tools in terms of function and use. Project-Based Learning/Group Work In pairs/ small groups, visit a sewing centre of choice/surf the internet to identify the hand sewing and machine sewing tools in clothing construction. Compare the tools and equipment to discuss their similarities and differences in relation to their functions and uses.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning	
Teaching and Learning Materials	• Sewing kits: Needles, thread, measuring tape, scissors and chalk, etc. • Sewing machine and manual • Charts/posters showing tools and their functions • Fabric pieces, needles and thread in different colors		• Notions: Buttons, zippers and elastic, etc. • Sewing machine for demonstration • Fabric samples showing different seams and finishes • Charts displaying seam types and finishes, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.3.1.CS.2	I.3.1.LI.1	I.3.1.AS.1
Demonstrate knowledge and understanding of Sewing notions, basic stitches and their uses in clothing construction.	Identify common sewing notions and describe their uses in garment construction. Experiential Learning/Talk for Learning Approaches: Brainstorm/Brain-write to discuss sewing notions used in clothing construction. Using the responses from brainstorming to provide further explanation to support learners understanding. Group Work: In mixed gender/ability groups, observe samples of notions used on different garments to explain the role of sewing notions in garment construction. E.g. Sewing Notions: Thread, buttons, zippers, elastic, bias, tape and interfacing.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.3.1.LI. 2 Demonstrate different types of basic stitches used in clothing construction. Talk for Learning Approaches: Brainstorm/Brain-write to explain the concept of stitches. Using the responses from brainstorming, come up with the correct meaning of stitches. E.g. Stitches are patterns of thread formed by a threaded needle in an article. Examples of stitches are; tacking, chain, zigzag, loop, hemming, stem, satin and backstitch. <i>Note: encourage all learners to participate, share and accept each other's views respectfully.</i> Structured Talk for learning: Observe realia/charts/pictures/video of different types of stitches, list and describe each one and possibly say their uses to aid understanding. Experiential Learning: Observe demonstration/watch video to practice basic hand stitches on fabric pieces.	I.3.1.AS.2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	I.3.1.LI.3 Categorise stitches based on their functions. Structured talk for Learning/Problem based Learning Approaches: With the aid of samples/charts/videos/posters on stitches, discuss the functions of stitches. Group Work: In mixed ability groups, learners classify stitches according to functions: E.g. Temporary stitches: These stitches are used to hold fabric pieces together temporarily during the construction process. They are removed once the final, permanent stitching is in place. Temporary stitches are essential for tasks like fitting, positioning, and ensuring accuracy before committing to permanent seams. E.g. • Basting Stitch • Tailor's Tacking • Even Tacking Stitch Permanent stitches: These stitches are intended to hold fabric pieces together permanently. They provide strength and durability to the finished garment or item. E.g. • Running Stitch • Backstitch • Overcasting, etc. Group Work/Talk for learning approaches: Using mixed ability/gender groups, use pyramid discussion to describe the general guidelines for creating stitches on card boards, sheets of papers, sticky notepads, flip charts or exercise books. Share your views for whole class discussion. E.g. • Select the most suitable stitch for the work to enable you to get the right effect. • Select needles that are suitable for the thread and fabric and comfortable for you. • Fasten on and off securely. This means begin double stitch and end with double stitch. • Cut sewing thread at an angle, using sharp scissors. Never bite or break thread. For permanent stitching, thread can match or contrast as preferred, etc.	I.3.1.AS.3 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
--	--	--

	I.3.I.LI.4		I.3.I.AS.4	
	Make samples of stitches suitable for different functions in clothing. Group Work/Project Based Approaches: In mixed gender/ability/random groups, make samples of temporary and permanent stitches. In your groups, make stitches on your individual project articles. E.g. • Chain stitches • Satin stitches • Blanket stitches • Machine stitches • Over sewing • Overcasting • French knot • Tacking, etc. Exhibit samples of stitches for gallery walk and appraisal. Use a comparison chart to compare hand and machine stitches in terms of efficiency and durability.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning	
Teaching and Learning Materials	• Sewing kits: Needles, thread, measuring tape, scissors and chalk, etc. • Sewing machine and manual • Charts/posters showing tools and their functions • Fabric pieces, needles and thread in different colors		• Notions: Buttons, zippers and elastic, etc. • Sewing machine for demonstration • Fabric samples showing different seams and finishes • Charts displaying seam types and finishes, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
1.3.1.CS.3	1.3.1.LI.1	1.3.1.AS.1
Demonstrate the understanding how to select and use seams and edge finishes in clothing construction appropriately.	Identify different types of seams used in garment construction. Problem based learning: In pairs/mixed ability groups, brain-write/brainstorm to explain the concept of seams, with specific examples. E.g. A seam is made when two or more pieces of fabrics are securely joined together with permanent stitches. French seam, overlaid seam, plain seam, run and fell seam. Group work/ Collaborative learning: In pairs/mixed ability groups, read relevant texts, charts, slides, pictures, videos or surf the internet to explain seams. Talk for learning: Collaborative/group learning Approaches: In mixed gender/ability groups, use mingling, onion ring/radio reporter strategies discuss, the importance of seams in clothing construction. Present your group reports for a whole class discussion. Talk for Learning: Discuss the types of seams you have on your school uniforms. Use the think-square-share method to identify the factors to consider when choosing a seam. E.g. • The Fabric Type • Seam placement • Style of the article • Product type and use • The age of the wearer, etc. Encourage learners to respect each other's views on their choice of seams for varied articles. Group Work: In mixed ability/gender groups, analyse the pros and cons of selecting specific seams for varied clothing articles and present it in class using charts/pictures/PowerPoint presentation/concept maps, etc. Experiential/Structured talk for learning Approaches: With the aid of videos, charts, slides or posters discuss the general rules for making seams E.g.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Threads used in making seams should be suitable for the fabric • The seam width must correspond to the fabric texture • Stitch seams firmly to produce strong seams • Seams should be well pressed to ensure quality work • Backstitch seams (stitch over) at the beginning and ending for reinforcement, etc. Group work/Collaborative learning Approaches: In mixed ability groups, use talking point/ pyramid discussion/panel discussion to examine the general rules for making seams. Experiential learning/Group work: In mixed ability/gender cultural/friendship groups, organize a visit to sewing shops/centers within the community to ascertain the rules regarding the making of the various types of seams.	
	I.3.1.LI.2	I.3.1.AS.2
	Make specimens of commonly used seams in garment construction. Experiential Learning /Structured Talk for Learning Approaches: Watch a video/demonstrate for learners to observe how to make seams. Make samples of selected seams E.g. Plain seam, French seam, overlaid seam, machine fell seam, double stitched seams, welt seam. <i>Note: teacher/facilitator goes round, observes learners work and guides them.</i> Group Work/Project Based Approaches: In mixed gender/ability/random groups, make samples of seams. In your groups, make seams on your individual projects. Exhibit samples of garment features for gallery walk and appraisal.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	I.3.I.LI.3 Apply suitable edge finishes to prevent fabric fraying. Problem based learning: In pairs/mixed ability groups, brain-write/brainstorm to explain the concept of edge finishes. E.g. Edge finishes are varieties of techniques used to trim and attach the cut edges of garments and woven fabrics. Group work/ Collaborative learning: In pairs/mixed ability groups, read relevant texts, charts, slides, pictures, videos or surf the internet to explain edge finishes. Talk for learning/ Group Learning Approaches: In mixed gender/ability groups, use mingling, onion ring/radio reporter strategies, discuss the importance of edge finishes in clothing construction. E.g. •Edge finishes prevent fraying •improve durability •give the finished garment a polished and professional look, etc. Present your group reports for a whole class discussion and appraisal. In mixed ability/gender groups, think-pair-share the different types of edge finishes and present to class. E.g. Facing, binding, hemming, Embellishment with Embroidery or Trimming, Attachment of Lace, Attaching Ruffles or Flounces, Attaching Fringe Edges, etc. Group Work: In mixed ability/gender/random groups, discuss when edges can be finished in the construction of clothing articles. Experiential Learning: Visit sewing shops in the community to observe how the edges of various articles are finished.	I.3.I.AS. 3 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
--	--	--

	Problem-Based Learning: In pairs, describe the different methods of finishing edges of clothing artefacts/articles. E.g. • Facing: Fabric is sewn around the raw edges of a garment, turned inside out and sewn in place to give a smooth, neat surface. This technique is often used for necklines, armholes and garment openings. • Binding: Narrow strips of fabric are usually cut on the bias and used to bind the raw edges of a garment. It can be left visible or hidden inside, and can have a neat or decorative finish. It is often used on quilts and garment edges, etc. Experiential Learning /Structured Talk for Learning Approaches: Show a video/demonstrate for learners to observe how to make edge finishes. Make samples of edge finishes on your project articles. <i>Note: teacher/facilitator goes round, observes learners work and guides them.</i>	
	I.3.I.LI. 4	I.3.I.AS. 4
	Evaluate the strength and appearance of different seam finishes in clothing construction. Talk for Learning approaches: Discuss the strength and appearance of the different types of edge finishes you have on your school uniforms. Use the think-square-share method to identify the factors to consider when choosing an edge finish. E.g. • The type of fabric being used • The kind of article • Shape of the edge • Maintenance and care • Durability, etc. <i>Note: Encourage learners to respect each other's views on their choice of finishes for varied edges of clothing articles.</i> Group Work: In mixed ability/gender groups, analyse the pros and cons of selecting specific edge finishes for varied clothing articles and present it in class using charts/pictures/power point presentation/concept maps, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

Teaching and Learning Materials	• Sewing kits: Needles, thread, measuring tape, scissors and chalk, etc. • Sewing machine and manual • Charts/posters showing tools and their functions • Fabric pieces, needles and thread in different colors	• Notions: Buttons, zippers and elastic, etc. • Sewing machine for demonstration • Fabric samples showing different seams and finishes • Charts displaying seam types and finishes, etc.

Subject **CLOTHING AND TEXTILES OPTION**
 Strand **3. CLOTHING AND TEXTILES PRODUCTION TECHNOLOGY**
 Sub-Strand **2. FASHION DESIGN AND GARMENT CONSTRUCTION TECHNOLOGY**

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
1.3. 2.LO.1		
Apply knowledge and understanding of the importance and techniques of arranging fullness in garment design and construction.	Communication and collaboration skills: Understand and accept other people's perspectives. Able to follow a speaker and create their own meaning, probing questions to check and deepen their own understanding. Able to follow and take part in a group discussion and express opinions when called upon. Apply knowledge to real life situations by examining evidence to solve problems. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Can convey simple ideas or thoughts to a wider group, for example in a group discussion. Digital literacy: Can confidently prepare presentation using ICT and respecting other people's privacy. Share information among team members using social media ethically. Ability to search and share digital information. Ability to type presentations and reports. Creativity and innovation: Ability to combine ideas and concepts to make new ones. Can merge simple ideas to create new ones and identify those ideas have different components. Personal development and Leadership skills: Able to articulate and explain one's feelings in a group situation and working with others.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths in clothing selection. • Interrogate their stereotypes and biases about gender and the role men, women and people with special needs play in the selection and production of clothing items. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: Participate in decision-making related to classroom activities and rules. • Explore and apply different skills in clothing construction. • Offer positive support to each other. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.

I.3.2.LO.2		
Develop practical skills in incorporating openings to enhance garment fit and aesthetics.	Critical Thinking and Problem-solving skills: Think rationally and clearly to solve problems. Use open and closed questions to construct a conclusion or ending. Communication and collaboration skills: Understand and accept other people's perspectives. Able to follow a speaker and create their own meaning, probing questions to check and deepen their own understanding. Able to follow and take part in a group discussion and express opinions when called upon. Apply knowledge to real life situations by examining evidence to solve problems. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Can convey simple ideas or thoughts to a wider group, for example in a group discussion. Digital literacy: Can confidently prepare presentation using ICT and respecting other people's privacy. Share information among team members using social media ethically. Ability to search and share digital information. Ability to type presentations and reports.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Interrogate their stereotypes and biases about gender and the role men, women and people with special needs play in the selection and production of clothing items. Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.3. 2. CS I	I.3.2.LI.1	I.3.2.AS.1
Demonstrate the ability to describe different methods of arranging fullness in garment construction.	Demonstrate practical skills in creating different fullness arrangements in garments Talk for Learning approaches: Brainstorm to review lesson on the fullness in clothing construction i.e., meaning and types. E.g. • Gathers • Pleats • Darts • Shirring, etc. Experiential Learning/Group Work Approaches: In mixed gender/ability/friendship groups, surf the internet, posters, videos or pictures to find out other types of fullness used in clothing construction. Present your findings for a whole class discussion using varied methods of presentation.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.3.2.LI.2	I.3.2.AS.2
	Demonstrate practical skills in creating different fullness arrangements in garments. Experiential Learning/Structured Talk for Learning: Watch a video/demonstrate how to make arrangement of fullness. Make samples of fullness used in clothing construction. E.g. • Pleats • Darts • Gathers • Tucks, etc. <i>Note: teacher/facilitator goes round to observe learners work and guide them.</i> Exhibit samples of work for appraisal by both teachers and peers. Learners should be honest in appraising their peer's work/product.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	I.3.2.LI.3		I.3.2.AS.3	
	Analyse the impact of fullness techniques on the fit and appearance of garments. Talk for Learning/ Experiential Learning: In mixed ability and gender groups, brain-write to discuss on why fullness is important in garment construction. Ask learners to name different fullness techniques they are familiar with. Observe videos, pictures or real garments with different fullness techniques such as gathers, pleats, darts, shirring and tucks and discuss their effect on fit and appearance. Visit dressmaker's shop to find out how different fabrics affect the type of fullness used in garment construction. Provide different fabric samples and guide learners to examine how fabric types affect fullness techniques. E.g. • Used to shape • Enhance design • Provide ease for movement, etc. Project-Based Learning: Individually design and construct a mini garment featuring two fullness techniques and evaluate the final outcome. Group Work: In pair/small groups reflect on how fullness techniques contribute to aesthetics and movement in garments. Discuss how different fabrics react to fullness techniques and how this influences garment design decisions.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning	
Teaching and Learning Materials	• Various fasteners: Buttons, hooks and eyes, zippers, Velcro and press studs • Sewing kits: Needles, thread and scissors • Fabric swatches		• Sewing machine • Multimedia: Videos or online tutorials. • Worksheets for evaluation and reflection, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
1.3.2.CS. 2	1.3.2.LI.1	1.3.2.2. AS.1
Demonstrate the ability to select different types of openings and their application in garment construction.	Explain the types of garment openings and their uses in garment design and construction. Talk for Learning/Collaborative Learning Approaches: In pairs/groups, use think-pair-share/shower thought/onion ring, to discuss - the types of openings/fastenings - examples of fasteners/closures that can be used to close openings. E.g. Openings: - Continuous wrap - Faced-slit - Box pleat - Fly front - Bound - Hem, etc. In gender/ability groups, use pyramid/panel discussion strategies to discuss factors that influence the choice of openings and fastenings. E.g. - Type of fabric - Age of the wearer - Style of the garment, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	1.3.2.LI.2	1.3.2.AS.2
	Demonstrate the steps in constructing different types of openings. Experiential Learning /Structured Talk for Learning Approaches: Watch a video/demonstrate for learners to observe how to make openings and fix fasteners. Make samples of openings and fix appropriate fasteners or closures. Group Work/Project Based Approaches: In mixed gender/ability/random groups, make samples of openings on articles and fix appropriate fasteners /closures. In your groups, make openings/fastening on your individual project articles and fix appropriate fasteners or closures. <i>Note: teacher/facilitator goes round, observes learners work and guides them.</i>	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	I.3.2.LI.3		I.3.2.AS.3
	Assess the suitability of various openings for different garment designs. Group Work/Project Based Approaches: In mixed gender/ability/random groups, visit individuals, families and fashion designers to find out the factors that influence the suitability of different openings on articles. In your groups, examine the openings of different garments and household articles to assess the suitability of the openings. E.g. Factors such as fabric type, garment style, functionality, aesthetics and wearer comfort, etc.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Various fasteners: Buttons, hooks and eyes, zippers, Velcro and press studs • Sewing kits: Needles, thread and scissors • Fabric swatches	• Sewing machine • Multimedia: Videos or online tutorials. • Worksheets for evaluation and reflection, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
I.3. 2.CS 3	I.3.2.LI.1	I.3.2.AS.1
Demonstrate the ability to select and attach different types of fasteners to enhance the durability and aesthetic value of garments and household articles.	Identify different types of fasteners and their applications in garment construction. Talk for Learning/Collaborative Learning Approaches: In pairs/groups, use think-pair-share/shower thought/onion ring, to identify different types of fasteners and their applications in garment construction. E.g. Fasteners/closures: • Zipper • Hooks and eye • Ribbon • Press-studs • button and buttonhole/loop • Velcro • Hook and bar, etc. Openings and their fasteners/closures: • Fly front - Button and buttonhole • Bound - Press stud, hook and eye/bar, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	I.3.2.LI.2	I.3.2.AS.2
	Demonstrate techniques for attaching fasteners securely and neatly. Experiential Learning/Group Work: In pairs and small groups, observe videos, posters and pictures showing different types of fasteners to discuss the importance of fasteners in clothing construction and their applications. Organise demonstration session for learners to observe different fastener attachment techniques. E.g. • Buttons: Demonstrate how to sew a flat button and a shank button securely using the correct stitching technique. • Hooks and Eyes: Show how to attach hooks and eyes neatly on fabric. • Zippers: Demonstrate the process of attaching a centred zipper.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Press Studs & Velcro: Guide learners in securing these fasteners neatly on fabric, etc. Project-Based Learning Approach: Individually practice attaching buttons, zippers and hooks on different opening of fabrics to create openings and fastenings album. Exhibit the albums for peer evaluation to assess each other's work based on neatness and security. Guide learners to evaluate their work and make improvements where necessary.	
	I.3.2.LI.3	I.3.2.AS.3
	Evaluate the durability and aesthetic appeal of different fasteners in garment design. Experiential Learning Approach: Visit a sewing shop/garment sales outlet to assess the durability and aesthetic appeal of different fasteners in garment design. Present your findings for whole class discussion on the following • What makes a fastener durable? • How do fasteners contribute to the overall appearance of a garment? Problem-Based Learning: In small groups, select a fastener of choice and surf OERs or other sources to research and write a report on the following: • Durability factors: Material, frequency of use and strength. • Aesthetic appeal: Design, visibility and suitability for different outfits. • Best uses of the fastener in garment construction, etc. Encourage learners to test the durability by fastening and unfastening their sample works multiple times.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Various fasteners: Buttons, hooks and eyes, zippers, Velcro and press studs • Sewing kits: Needles, thread and scissors • Fabric swatches	• Sewing machine • Multimedia: Videos or online tutorials. • Worksheets for evaluation and reflection, etc.

YEAR TWO

Subject CLOTHING AND TEXTILES
 Strand I. PSYCHOSOCIAL ASPECT OF CLOTHING
 Sub-Strand I. UNDERSTANDING CONCEPTS AND PRINCIPLES OF CLOTHING

Learning Outcomes	21 st Century Skills and Competencies	GESI ³ , SEL ⁴ and Shared National Values
2.1.1.LO.1 Analyse how figure types influence clothing selection and make appropriate choices for different body shapes.	Communication and Collaboration skills: Express one's thought and ideas in a group. Listen to and tolerate other's views. Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy) Critical thinking and problem solving: Develop new ideas on how to measure figure types for garments to avoid mistakes. Critical/innovation and Resourcefulness: Create new ideas and designs.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate to clothing. • Interrogate their stereotypes and biases about gender and the role men and women play in clothing selection and use. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective use of clothing and accessories. • Sensitive to the inter-relatedness of the various aspects of life. • Value and promote justice in home and in society. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build learners' self-confidence in relation to dress- sense. • Recognise commonalities and differences (e.g., racial, cultural) that exist among learners. • Demonstrate respect for diversity among learners and find ways for learners to share their cultural backgrounds and experiences.

³ Gender Equality and Social Inclusion

⁴ Socio-Emotional Learning

		• Provide opportunities for learners to practice skills related to respecting others. National Values: • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
2.1.1.LO.2		
Apply the principles of clothing design to enhance different figure types.	Communication and Collaboration skills: • Express one's thought and ideas in a group • Listen to and tolerate other's views • Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy) Critical thinking and problem solving: Develop new ideas on how to measure figure types for garments to avoid mistakes. Critical/innovation and Resourcefulness: Create new ideas and designs.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate to clothing. • Interrogate their stereotypes and biases about gender and the role men and women play in clothing selection and use. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective use of clothing and accessories. • Sensitive to the inter-relatedness of the various aspects of life. • Value and promote justice in home and in society. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build learners' self-confidence in relation to dress- sense. • Recognise commonalities and differences (e.g., racial, cultural) that exist among learners. • Demonstrate respect for diversity among learners and find ways for learners to share their cultural backgrounds and experiences.

		• Provide opportunities for learners to practice skills related to respecting others. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
--	--	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.1.1.CS.1	2.1.1.LI.1	2.1.1.AS.1
Demonstrate knowledge and understanding of the relationship between clothing selection and figure types.	Describe different figure types. Structured Talk for Learning: In mixed gender/random groups, use pictures/photos/videos to observe and describe different figure types. E.g. • Tall and thin • Tall and plump • Short and thin • Short and plump • Large and heavy hip • Large and heavy bust, etc. Group work and Collaborative learning: In mixed gender groups, identify measurements required in determining figure types. E.g. • Height • Width Experiential Learning: In mixed gender/random groups: In mixed ability/gender groups, examine body proportions and determine figure types. Compare figure type with each other. Group Work and Collaborative Learning: In mixed ability/gender groups, analyse body proportions and determine figure types using individual and standard body measurements. Problem based learning: In groups, suggest/select clothing that will enhance the following figure types: • Short and plump figure • Very tall and thin • Heavy bust and hips, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	2.1.1.LI.2 Take body measurements and apply them in selecting suitable clothing for different figure types. Structured Talk for Learning: In mixed gender/random groups, discuss rules for taking body measurements. E.g. • Use a correct tape measure • Stand upright when being measured • Record all measurements taken, etc. Present group reports for whole class discussion. Group Work and Collaborative Learning: In mixed ability/gender groups, take accurate body measurements of your friends and record. E.g. • Bust • Blouse length • Nipple to nipple • Hips • Slit length, etc. Use the recorded measurements in selecting clothing from a range of clothing for your friend and yourself.	2.1.1.AS.2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.1.1.LI.3 Analyse how different clothing styles enhance or balance various figure types. Group Work and Collaborative Learning: In mixed ability/gender groups, observe displayed images of different body shapes to describe their features. Discuss how clothing choices can enhance or balance figure types. Interact with your group peers and discuss personal preferences and common misconceptions in clothing selection. E.g. Clothing must be designed to suit the figure- either to emphasise or play down figure details in order to enhance the appearance of the person. Problem based learning: In small groups, select a specific figure type of your choice, conduct an interview to find out from individuals with similar figure type how they select and use clothes.	2.1.1.AS.3 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Present appropriate and inappropriate clothing styles for the figure type chosen for a whole class discussion to compare and refine ideas.	
Teaching and Learning Materials	• Charts/photos/pictures/videos of the various figure types • Tape measure • Note pad, Pencil • Samples of clothing, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.1.1.CS.2	2.1.1.LI.1	2.1.1.AS.1
Demonstrate the ability to apply design principles in clothing selection for different figure types.	Explain how design principles affect the appearance of different body shapes. Experiential Learning/Problem based learning: In mixed gender/cultural groups, surf the internet for OERs and other relevant sources to observe images of different body shapes: pear, apple, hourglass, rectangular, inverted triangle to: - Describe how clothing styles impact body appearance. - Discuss how applying design principles can enhance different body shapes. - Identifying design principles in clothing. Groups present findings and explain how design principle affects different body shapes. E.g. - Balance: Refers to the equal distribution of visual weight in a design. - Effect on body shape: - Clothing with balanced elements such as A-line skirts for pear-shaped bodies creates a proportionate look. - Horizontal stripes widen a narrow frame, while vertical lines elongate a short figure, etc. Emphasis: Highlights a specific part of the body to draw attention. Effect on body shape: - Strategic use of colour, accessories and patterns directs attention to or away from certain areas of the body. - A belt on an hourglass figure enhances the waistline - Bright tops for pear-shaped bodies draw attention upwards, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.1.1.LI. 2	2.1.1.AS. 2
	Recommend appropriate clothing choices for different figure types to achieve a flattering appearance. Structured Talk for Learning: In mixed gender/random groups, use different clothing items and experiment with mixing and matching to suit various figure types. Present the reports for whole class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Group Work and Collaborative Learning: In mixed ability/gender groups, watch videos/observe samples of fashion sketches that illustrate balance, emphasis, and proportion. Individually create simple outfit sketches based on a chosen figure type. Organise an exhibition to display the sketches for peer reviews based on effectiveness in enhancing figure types. Learners take turns trying on or displaying outfits on models, explaining how each design principle was applied. Experiential Learning/ Collaborative Learning In mixed ability/ friendship groups, organise a panel discussion/role-play on best styling techniques for each body shape. Individual sketch outfit designs for different body shapes, ensuring the use of at least three design principles. Present and justify their clothing choices based on figure enhancement techniques.	
Teaching and Learning Materials	• Charts/photos/pictures/videos of the various figure types • Tape measure • Note pad, Pencil • Samples of clothing, etc.	

Subject CLOTHING AND TEXTILES
 Strand 1. PSYCHOSOCIAL ASPECT OF CLOTHING
 Sub-Strand 2. WARDROBE PLANNING AND APPEARANCE MANAGEMENT PRACTICES

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
2.1.2.LO.1 Apply wardrobe planning principles to create functional and stylish wardrobes that suit individual needs, lifestyles and budgets.	Communication and Collaboration skills: Express one's thought and ideas in a group. Listen to and tolerate other's views. Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy) Critical thinking and problem solving: Develop new ideas on how to measure figure types for garments to avoid mistakes. Critical/innovation and Resourcefulness: Create new ideas and designs.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate to clothing. • Interrogate their stereotypes and biases about gender and the role men and women play in clothing selection and use. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective use of clothing and accessories. • Sensitive to the inter-relatedness of the various aspects of life. • Value and promote justice in home and in society. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build learners' self-confidence in relation to dress-sense. • Recognise commonalities and differences (e.g., racial, cultural) that exist among learners.

		• Demonstrate respect for diversity among learners and find ways for learners to share their cultural backgrounds and experiences. • Provide opportunities for learners to practice skills related to respecting others. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility
2.1.2.LO.2		
Evaluate and apply appearance management techniques to enhance personal and professional image.	Critical Thinking and Problem-Solving: Able to identify sources/classifications of fibres using realia. Able to choose between the options that they have created and use some justifiable method to do so. Communication and Collaboration Skills: Learn from and contribute to the learning of others and give constructive feedback. Assume shared responsibility and cooperate in different groups. Digital Literacy: Teamwork using diverse ICT tools. Can analyse videos to understand scientific principles. Critical Thinking and Problem-Solving Skills: Making reasoned judgments and conclusions.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/ myths about gender as they relate to clothing construction. Interrogate their stereotypes and biases about gender and the role men, women and special needs. • people play in clothing construction. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Identify and express their feelings about fibres and clothing construction. • Appreciate the different types of fibres and how they are used.

		National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work, etc.
--	--	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.1.2.CS.I	2.1.2.LI I	2.1.2.AS I
Demonstrate understanding and application of wardrobe management principles to create functional and stylish wardrobes that suit individual needs, lifestyles and budgets.	Analyse different types of wardrobes and their suitability for various occasions. Group work/Collaborative Learning Approaches: In mixed ability/gender groups, identify factors that influence personal and family wardrobe management practices. E.g. • Economic, lifestyle and occupation • Climate and environment • Fashion trends and personal style • Psychological, socio-cultural and religious beliefs • Family size, age, gender and structure • Clothing maintenance and storage space, etc. Structured Talk for Learning /Experiential Learning Approaches: Observe samples/charts/videos/posters/ of wardrobe to discuss samples of well-planned wardrobes for different lifestyles. Create a checklist of wardrobe essentials. E.g. Everyday Wear (Casual Outfits) • T-shirts (plain & patterned) – at least 3 • Jeans or trousers – 2 pairs • Casual dresses – 2 Formal & Professional Wear • Dress, shirts or blouses – 2 • Formal dress or suit – 1 • Formal shoes – 1 pair, etc. Experiential Learning Approach: Individually/in pairs use the checklist to record wardrobe essentials of selected wardrobe. In small groups, compare the lists and discuss gaps or missing items in the wardrobes chosen. In a whole class discussion, reflect on the major findings to create a class-based wardrobe planning guide.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	2.1.2.LI. 2 Demonstrate wardrobe organisation techniques. Talk for Learning and Problem-Solving Approach: In mixed gender and cultural groups, select any of the following settings: • School • Work • Social events, etc. Create a wardrobe checklist based on your selected setting. Groups present their wardrobe plans to the class for peer and teacher assessment. Project-Based Learning: Conduct an investigation to assess personal/family wardrobe and identify missing essential items. Apply the class-based wardrobe planning guide to create a personal wardrobe plan for different settings. Present your wardrobe and discuss ways to improve the wardrobe within your budget. Collectively reflect on how a well-planned wardrobe contributes to confidence and professionalism of individuals, families and groups. Problem-Based Learning and Collaborative Learning: In mixed cultural groups organise a community durbar to demonstrate techniques of organising wardrobes to promote wardrobe management awareness among individuals and families in the society. E.g. • Categorising clothing items • Folding and stacking clothes properly • Hanging clothes correctly • Storing seasonal clothing • Organising accessories and footwear • Maintaining wardrobe cleanliness, etc.	2.1.2.AS. 2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
--	---	--

Teaching and Learning Materials	• Fashion magazines • Wardrobe planning charts • Clothing samples • Grooming kits • Hygiene products • Videos on personal care, etc.
--	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.1.2.CS.2	2.1.2.LI.1	2.1.2 .2 AS. 1
Demonstrate understanding and skills of enhancing personal appearance through effective appearance management.	Assess the role of accessories, hairstyles and makeup in enhancing personal appearance. Talk for Learning and Problem-Solving Approach: In mixed gender and cultural groups, think-pair-share to explain the importance of good grooming, personal hygiene and clothing maintenance in appearance management. E.g. Good grooming: • Enhances self-confidence and self-esteem. • Creates a positive first impression. • Promotes personal and professional success. • Improves social interactions and acceptance, etc. Personal hygiene: • Prevents body odour and infections. • Enhances overall health and well-being. • Reflects a responsible and disciplined personality. • Contributes to a positive and respectable image, etc. Clothing maintenance • Extends the lifespan of clothes. • Maintains a neat and polished appearance. • Saves money by reducing frequent clothing replacement. • Enhances confidence in personal presentation, etc. Experiential Learning/Group Work: In small groups, study a case to discuss real-life scenarios where grooming affects first impressions. • Display images of different outfits with and without accessories. • Guide learners to compare and discuss how accessories change the overall look. • Engage learners to relate the discussion to real-life situations such as job interviews, formal events and informal activities, etc. In mixed ability/gender/cultural groups use the snowball strategy to describe the factors that contribute to personal appearance.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	E.g. • Personal grooming and hygiene • Accessory and makeup application • Posture and body language • Health and fitness • Personal style and identity • Wardrobe management, etc. Project-Based Learning/ Collaborative Learning: In mixed cultural/gender groups, interview individuals, families and beauticians to assess the role of accessories, hairstyles and makeup in enhancing personal appearance. Present a written report for peer and teacher assessment E.g. Accessories: • Enhancement of outfits • Expression of personality • Professional and social appropriateness • Balance and proportion, etc. Hairstyles: • Facial enhancement • Professionalism and grooming • Versatility and trend adaptation • Cultural and personal identity, etc. Makeup: • Highlighting facial features • Boosting confidence • Adaptation for different occasions • Skin enhancement and protection, etc. Note • <i>Emphasise that fashion and beauty should reflect personality and comfort.</i> • <i>Allow learners to explore styles that suit them best to promote self-confidence.</i>	
--	---	--

	2.1.2.LI. 2 Demonstrate appropriate dress and grooming for different occasions. Experiential Learning and Collaborative Learning Organise a demonstration session for learners to observe a resource person in the beauty and cosmetology industry, demonstrating appropriate dress and grooming for different occasions such as formal, casual, business and cultural events. In pairs/small groups, demonstrate how to style hair for various occasions to experiment with different hairstyles on models' heads or partners. • Guide learners in applying minimal makeup using safe, skin-friendly products. • Put learners into groups and assign each a category of accessories, hairstyles, makeup research on how individuals and families apply them to enhance appearance. Talk for Learning Approach: In round groups, use the build on what others say techniques to discuss the importance of appearance management. E.g. • Confidence • Professionalism • Overall attractiveness • Self-esteem etc.	2.1.2.AS. 2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Fashion magazines • Wardrobe planning charts • Clothing samples • Grooming kits • Hygiene products • Videos on personal care, etc.

CLOTHING AND TEXTILES
2. TEXTILES IN CLOTHING
1. CHARACTERISTICS OF FIBRES AND FABRICS FUNCTIONALITY

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
2.2.1.LO.1		
Apply understanding of the physical, chemical and mechanical properties of fibres in fabrics construction and their implication in clothing production.	Communication and Collaboration skills: Communicate effectively and confidently verbally and in writing to different participants. Share ideas using positive language and giving feedback. Critical thinking and problem solving: Analyse, make judgements and conclusions.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate TO clothing selection, use and care. • Interrogate their stereotypes and biases about gender and the role men and women play in clothing selection and use. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Offer a range of strategies to help them manage their work (e.g., checklists, reminders, prompts). • Actively practice self-care strategies.

		• Provide opportunities to practice skills related to respecting others in relation to clothing selection and use. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
2.2.1.LO.2		
Apply knowledge to analyse how fibre properties influence fabric characteristics and selection of appropriate textiles for clothes and household apparels.	Communication and Collaboration skills: Communicate effectively and confidently verbally and in writing to different participants. Share ideas using positive language and giving feedback. Critical thinking and problem solving: Analyse, make judgements and conclusions.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate to clothing selection, use and care. • Interrogate their stereotypes and biases about gender and the role men and women play in clothing selection and use. SEL: Learners having been given the opportunity to experience varied teaching

		approaches in an enabling environment will be equipped with social emotional learning skills to: • Offer a range of strategies to help them manage their work (e.g., checklists, reminders, prompts). • Actively practice self-care strategies. • Provide opportunities to practice skills related to respecting others in relation to clothing selection and use. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard workHumility, etc.
--	--	--

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.2.1.CS.1	2.2.1.LI.1	2.2.1.AS.1
Demonstrate understanding of the physical, chemical and mechanical properties of fabric construction and their Implications in clothing production.	Explain the concept fabric and their uses in clothing construction. Problem-Based Learning: In mixed gender/random groups, brainstorm and come up with the meaning of fabric. E.g. Fabric is a large flat sheet of material made from solutions, fibres, yarns or combinations using various processes like weaving, knitting or bonding. It serves as the foundation of clothing construction. Structured Talk for Learning: In mixed gender/random groups, use pictures/videos/realia, observe/identify and describe the various types of fabrics and their uses in clothing construction. E.g. Types of fabrics in clothing construction: • Natural Fabrics: Made from fibres derived from plants or animals, these fabrics are breathable, comfortable and often biodegradable. • Synthetic Fabrics: Man-made fibres designed for durability, stretch and low maintenance. • Blended Fabrics: A mix of natural and synthetic fibres to combine the best qualities of both. • Specialty Fabrics: Designed for specific purposes or decorative effects, etc. Uses of fabrics in clothing construction: • Shaping and structure • Garment components • Functionality and comfort • Aesthetics and style • Durability and maintenance • Specialized applications, etc. Group work and Collaborative learning: In groups, classify different fabric samples based on their physical, chemical and mechanical properties. E.g. Physical properties of fabrics: • Texture: Smooth, rough, soft or stiff. • Weight: Light, medium or heavy, affecting drape and comfort.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Thickness: Determines insulation and durability. • Porosity: The ability of a fabric to allow air and moisture to pass through, etc. Chemical properties of fabrics: • Absorbency • Heat sensitivity • Reaction to chemicals, etc. Mechanical properties of fabrics: • Elasticity • Tensile strength • Drape • Wrinkle resistance, etc.	
	2.2.1.LI.2	2.2.1.AS.2
	Analyse fibre combinations in fabrics construction. Structured Talk for Learning: In mixed gender/random groups, use pictures/videos to describe combinations in fabrics. Talk for Learning: In mixed gender/random groups, use pyramid discussion to analyse fibre combinations in fabrics. E.g. • Blends • Mixtures, etc. Blends: Blend refers to a yarn or fabric which consist of two or more generically different fibre types. Blends cannot be separated and their fibres are not easily identified. Mixtures: Mixture refers to yarns of one family or generic type that are present in one area in the fabric (the warp) and yarns of another family or generic type being present in another area of the fabric (weft) or different colours of yarns that represent different fibres in the same fabric. Group work and Collaborative learning: In mixed gender groups, surf the internet for OERs and other relevant source to identify from range of fabrics blends and mixtures used in clothing construction. Present your findings for a whole class discussion using different presentation modes.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

Teaching and Learning Materials	• Fabric swatch kits for practical testing • Burn test kits (with safety gear) • Magnifying glasses or USB microscopes for fibre analysis • Fabric analyse App • Virtual microscope tools • Sample fabric test results recording sheet	• Chemical substances (Hydrochloric acid) for solubility test • Videos & online demonstrations for fabric science or textile testing tutorials, • Pictures/photos/ realia/ videos of types of fabrics • Specimen album of • Pictures/videos of fabric production techniques • Samples of fibres and fabrics, etc.
--	---	--

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.2. 1.CS.2	2.2.1.LI.1	2.2.1.AS.1
Demonstrate the ability to use different testing techniques to describe the differences between blends and mixtures.	Use practical testing techniques to describe the characteristics of blended and mixed fabrics. Structured Talk for Learning: In mixed gender/random groups, watch videos that depict the use of different testing techniques to differentiate between blends and mixtures. Group work and Collaborative learning: In your groups, mobilize materials used for experimenting visual and hand examination and burning test to differentiate between blends and mixtures used in fabric construction. E.g. Physical Tests: Visual and hand examination: • Blends: Consistent texture and feel. • Mixtures: Different textures or thicknesses in the warp and weft, etc. Burning test: Burn a small fabric sample to observe flame, smell and ash residue. • Blends: Produce mixed results like polyester melts, cotton burns. • Mixtures: Burn differently in different sections, etc. Experiential Learning: In groups, conduct the chemical and microscopic examination to describe the differences between blends and mixtures. E.g. Chemical tests: Solubility test to use specific chemicals such as acetone dissolves acetate, bleach weakens wool. • Blends: Partial dissolution or complex reactions. • Mixtures: Individual fibres dissolve separately, etc. Microscopic examination: Use a magnifying glass or microscope to observe individual fibres. • Blends: Mixed fibre structures within a single thread. • Mixtures: Different types of yarn visible. Record and present written reports on the findings for whole class discussion and appraisal using different modes.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	2.2.1.LI. 2 Analyse test results to make informed conclusions about fabric composition and functionality. Project-Based Learning/ Collaborative Learning: Search for pieces of fabric to test using different techniques. and conduct experiment to determine the fabric type and characteristics. Based on your test results, determine whether the fabric would be appropriate for making children’s school uniforms. Justify your response linking the fabric properties to the needs of school clothing as follows: - Durability - Stain resistance - Comfort - Washability, etc. E.g. Sample Fabric Test Results Recording Sheet <table><tr><th>S/N</th><th>Test Type</th><th>Observation</th><th>Possible Fibre(s)</th><th>Implications for Functionality</th></tr><tr><td>A</td><td>Visual & hand examination</td><td></td><td></td><td></td></tr><tr><td>B</td><td>Stretch test</td><td></td><td></td><td></td></tr><tr><td>C</td><td>Burn test</td><td></td><td></td><td></td></tr><tr><td>D</td><td>Solubility test</td><td></td><td></td><td></td></tr><tr><td>E</td><td>Microscopic examination, etc.</td><td></td><td></td><td></td></tr></table> Summary of Findings: - Fabric Composition. - Blended or Mixed Fabric. - Functional Properties. - Recommended Applications. - Conclusion, etc.	S/N	Test Type	Observation	Possible Fibre(s)	Implications for Functionality	A	Visual & hand examination				B	Stretch test				C	Burn test				D	Solubility test				E	Microscopic examination, etc.				2.2.1.AS. 2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
S/N	Test Type	Observation	Possible Fibre(s)	Implications for Functionality																												
A	Visual & hand examination																															
B	Stretch test																															
C	Burn test

Subject CLOTHING AND TEXTILES
 Strand 2. TEXTILES IN CLOTHING
 Sub-Strand 2. FIBRES AND FABRICS IN CLOTHING CONSTRUCTION

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
2.2.2.LO.1		
Apply understanding of fabrics construction techniques to select fabrics suitable for various purposes in clothing.	Communication and Collaboration Skills: Able to listen to peers and ask relevant questions based on what they heard. Learning from contributing to the learning of others. Able to adapt their presentation to better engage the audience during its delivery. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Digital Literacy: Able to use ICT tools to surf for relevant information confidently. Digital literacy will be used in class presentation. Ability to create simple video and audio recordings. Ability to explore print and electronic media information. Critical thinking and Problem-solving skills: Ability to use justifiable methods to choose between the options that they have created. Apply knowledge to real life situations in the use of clothes. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Apply their knowledge or make connections with what they learn in real life situations. Personal development and leadership skills: Able to articulate and explain their feelings in a group situation and working with others. Cultural identity and global citizenship: Awareness and cultural significance of wearing clothes.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/ myths about gender as they relate clothing selection, care and maintenance. • Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in clothing selection, care and maintenance. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective management and maintenance of clothing. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build self-confidence. • Practice and identify how others may be feeling about their choice of clothing.

		• Reflect on positive and negative consequences of their choice of clothing for occasions. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
2.2.2.LO.2		
Apply knowledge of fabric construction techniques to make informed decisions in clothing use, care and maintenance for personal, family and industry needs.	Communication and Collaboration Skills: Able to listen to peers and ask relevant questions based on what they heard. Learning from contributing to the learning of others. Able to adapt their presentation to better engage the audience during its delivery. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Digital Literacy: Able to use ICT tools to surf for relevant information confidently. Digital literacy will be used in class presentation. Ability to create simple video and audio recordings. Ability to explore print and electronic media information. Critical thinking and Problem-solving skill: Ability to use justifiable methods to choose between the options that they have created. Apply knowledge to real life situations in the use of clothes. Able to identify and analyse different points of view they hear in a discussion and explain how they are different. Apply their knowledge or make connections with what they learn in real life situations. Personal development and leadership skills: Able to articulate and explain their feelings in a group situation and working with others. Cultural identity and global citizenship: Awareness and cultural significance of wearing clothes.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/ myths about gender as they relate clothing selection, care and maintenance. • Interrogate their stereotypes and biases about gender and the role men, women and special needs people play in clothing selection, care and maintenance. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective management and maintenance of clothing.

		SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Build self-confidence. • Practice and identify how others may be feeling about their choice of clothing. • Reflect on positive and negative consequences of their choice of clothing for occasions. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
--	--	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.2.2.CS.1	2.2.2.LI. 1	2.2.2.AS.1
Apply understanding of fabrics construction techniques to select fabrics suitable for various purposes in clothing.	Describe various fabric construction techniques in clothing. Structured Talk for Learning: In pairs, use pictures/videos/ realia, observe/identify and describe the various types of fabric construction techniques. E.g. The way a fabric is constructed affects its texture, strength, elasticity, drape and breathability which are all critical factors in choosing fabrics for specific garments. Woven fabrics: Interlacing yarns at right angles. • Plain Weave: Cotton, muslin and linen • Twill Weave: Denim and gabardine • Satin Weave: Satin and harme use, etc. Knitted fabrics: Interlocking loops of yarn. • Weft Knits: Jersey, rib knit • Warp Knits: Tricot and raschel lace, etc. Non-Woven Fabrics: Bonded or Felted Fibers. • Felt • Fleece • Interfacing, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.2.2.LI. 2 Classify fabrics based on construction techniques and explain their characteristics. Structured Talk for Learning: In pairs, use pictures/videos on fabric construction to classify fabric swatches under the following fabric construction techniques: • Woven fabrics • Knitted fabrics • Non-woven fabrics, etc. Group Work and Collaboration: In random groups, think-pair-share to discuss the features of each fabric and relate them to their construction method. E.g. • Texture • Stretch • Durability • Drape, etc.	2.2.2.I. AS.2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Whole Class Discussion: Groups present their findings, explaining the most suitable clothing applications for each fabric type. E.g. Woven Fabrics: Constructed through interlacing of yarns at right angles known. Types: • Plain weave • Twill weave • Satin weave, etc. Properties: • Strong and durable • Less stretchy (unless blended with elastane) • Holds shape well, etc. Suitable clothing applications: • Formal wear: Cotton, silk and linen for shirts, blouses and dresses. • Tailored garments: Wool and polyester for suits, blazers and trousers • Casual wear: Denim for jeans, chambray for shirts, etc. Justification: Woven fabrics provide structure and durability, making them ideal for garments that need to hold their shape and withstand frequent use, etc.	
	2.2.2.LI. 3	2.2.2.AS.3
	Compare types of fabrics construction techniques and their suitability for various clothing purposes. Structured Talk for Learning: In pairs, use pictures/videos/ realia, observe and compare types of fabric weaves. Group work and Collaborative learning: Put learners into small groups and give each group 3–4 fabric samples. Guide learners to use magnifying glasses to examine the fabrics to identify the construction technique such as plain weave, jersey knit, etc. Fill out the worksheet: • Fabric name/type: • Construction technique:	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Key properties: stretchy, wrinkle-prone and water-absorbent, etc. • Most suitable clothing applications, etc. Invite each group to presents their findings, explaining how fabric construction influences clothing selection, use, and care. Class discussion: Which fabric types would be best for specific purposes? E.g. • Sportswear • Formal wear • Children’s clothing, etc. Individually, choose a clothing item and write a one-page report recommending the best fabric type: • Identify the ideal construction technique. • Explain how the fabric properties meet the clothing purpose. • Suggest proper care practices to maintain the fabric’s quality. Experiential Learning: Visit the local fabric construction industry and observe how yarns are woven into fabrics and write a report on your observation. Present findings for whole class discussion.	
Teaching and Learning Materials	• Fabric swatches: Woven, knitted, non-woven and pile fabrics • Fabric scissors and rotary cutters • Pins and weights • Hand-sewing needles and sewing machines • Thread: Regular and stretch • Seam ripper • Measuring tape and rulers • Garments made from each fabric type (optional)	• Laundry detergent: Mild and regular • Iron and ironing board • Hangers, garment bags, storage bins • Fabric care labels: Real or printed examples • Care guide chart • Magnifying glasses • Chart of fabric construction techniques, etc.

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.2.2.CS.2	2.2.2.LI. 1	2.2.2.AS. 1
Apply knowledge of fabric construction techniques to make informed decisions in clothing use, care and maintenance.	Describe how different fabric construction techniques affect garment production. Group work and Collaborative learning: In mixed ability groups, using role-play discuss factors to consider when selecting fabrics for clothing construction. E.g. • Fibre content and construction method • Purpose and functionality • Texture and drape • Durability, care and maintenance • Aesthetics and style preferences • Cost and availability, etc. Whole class discussion: Reflect on the role-play activities and share experiences in selecting fabrics for clothing in your family. Experiential Learning and Problem-Based Learning: In pairs/small groups, conduct interview/watch video to: • Identify how different fabric construction techniques affect garment production. • Describe how the fabric construction techniques affect cutting and stitching and finishing methods. Present your findings using different presentation mode.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.2.2.LI. 2 Investigate how different fabric construction techniques influence cutting, stitching and their impact on garment production. Experiential Learning/Project-Based Learning: Organise a practical session for learners to investigate how different fabric construction techniques influence cutting, stitching and their impact on garment production. Provide swatches of various fabric types. Ask learners to feel, stretch and inspect each swatch. Guide the learners to document fabric properties. Cutting test: Individually cut out small rectangles from each fabric. Observe how the fabric reacts to cutting E.g. • Fraying • Curling • Distortion, etc.	2.2.2.AS. 2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Record observations in a table. Stitching test: • Sew straight and zigzag stitches on each fabric. • Use regular thread for woven and non-woven fabrics, stretch thread for knits. • Press the seams and observe how they lie. Whole reflection and discussion: Share your experience on the following: • Which construction technique was most challenging to work with? Why? • How did fabric behaviour affect stitch quality and seam appearance? • Discuss which fabrics would be best for specific garments. E.g. • Casual wear • Formal wear • Occasional wear • Uniform, etc.	
	2.2.2.LI. 3	2.2.2.AS. 3
	Demonstrate appropriate care and maintenance practices for garments made from various fabric constructions. Talk for Learning/Collaborative Learning: In mixed ability/cultural groups, brain-write to discuss care and maintenance practices for garments made from various fabric constructions. E.g. Woven Fabrics • Washing: Machine wash in warm or cold water. • Drying: Air dry or tumble dry on low heat to prevent shrinkage. • Storage: Fold or hang, avoid overcrowding, etc. Knitted Fabrics: • Washing: Hand wash or use a gentle machine cycle with cold water. • Drying: Lay flat to dry to avoid stretching. • Storage: Fold to prevent hanger marks; store in breathable bags for wool, etc. Non-Woven Fabrics: • Washing: Spot clean or dry clean, depending on the material. • Drying: Air dry only.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Storage: Lay flat or roll to prevent creasing, etc. Pile Fabrics: • Washing: Hand wash or dry clean to protect the pile. • Drying: Air dry or tumble dry on low with a towel to absorb moisture. • Storage: Hang with a padded hanger or fold with tissue paper, etc. Experiential Learning/Problem-Based Learning: Organise fabric care and maintenance challenge to engage learners in small groups to demonstrate the proper care and maintenance practices for garments made from various fabric constructions. E.g., Sorting and reading care labels to examine fabric labels and identify fibre content and care symbols. • Group fabrics according to similar care needs • Washing and drying test • Wash small fabric swatches using appropriate techniques. • Compare how swatches look and feel before and after washing. • Ironing and Storage Practice, etc. Demonstrate appropriate ironing techniques for each fabric such as steam for cotton and low heat for synthetics. Guide learners to practice folding or hanging garments to prevent damage Whole class discussion: Collectively reflect together to create a care guide for a garment of their choice, outlining appropriate washing, drying, ironing and storage techniques. How do appropriate care practices extend garment lifespan and reduce waste?	
Teaching and Learning Materials	• Fabric swatches: Woven, knitted, non-woven and pile fabrics • Fabric scissors and rotary cutters • Pins and weights • Hand-sewing needles and sewing machines • Thread: Regular and stretch • Seam ripper • Measuring tape and rulers • Garments made from each fabric type (optional)	• Laundry detergent: Mild and regular • Iron and ironing board • Hangers, garment bags, storage bins • Fabric care labels: Real or printed examples • Care guide chart • Magnifying glasses • Chart of fabric construction techniques, etc.

Subject **CLOTHING AND TEXTILES**
 Strand **3. CLOTHING AND TEXTILES PRODUCTION TECHNOLOGY**
 Sub-Strand **1. CLOTHING CONSTRUCTION PROCESSES**

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
2.3.1.LO.1		
Apply sewing processes and technology to construct clothing articles and package.	Communication and Collaboration skills: Communicate effectively and confidently verbally and in writing to different participants. Understand, relate to and be sensitive to others (empathic leadership). Speak clearly and convey simple answers or thoughts to a wider group in a group discussion. Share ideas and respect others' views during group work. Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy). Creativity/Innovation and Resourcefulness: Develop new ideas and designs. Design and cut bodice dress, skirt, trousers and shirt using inspirations from the environment. Generate new ideas and designs of packaging. Critical Thinking and Problem Solving: Thinking rationally and make judgement on clothing designs. Design garments to fit different figure types. Think rationally and solve packaging challenges Digital literacy: Use different ICT tools to surf the internet and for their presentations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Construction and packaging of clothing articles. • Embrace diversity and practice inclusion. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Practice skill related to clothing construction and respecting others. • Resolve interpersonal conflict with each other. • Have a range of options for completing their work. • Make choices about ways of presenting ideas. National Values: • Tolerance • Friendliness • Open mindedness Patience • Hard work • Humility, etc.

2.3.1.LO.2	Communication and Collaboration skills: Communicate effectively and confidently verbally and in writing to different participants. Understand, relate to and be sensitive to others (empathic leadership). Speak clearly and convey simple answers or thoughts to a wider group in a group discussion. Share ideas and respect others' views during group work. Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy). Creativity/ Innovation and Resourcefulness: Develop new ideas and designs. Renovate and remodel existing articles. Create new ideas and designs using inspirations from the environment. Generate new ideas on renovation and remodelling. Critical Thinking and Problem Solving: Think rationally and make judgment on customising clothing articles. Renovate and remodel clothing articles. Digital literacy: Use different ICT tools to surf the internet and for their presentations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds with regards to renovation and remodelling of clothing articles. • Embrace diversity and practice inclusion. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Practice skill related to customising of clothing articles and respecting others. • Resolve interpersonal conflict with each other. • Have a range of options for completing their work. • Make choices about ways of presenting ideas. National Values: • Open mindedness • Patience • Hard work • Humility, etc.
------------	---	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.3.1.CS.1	2.3.1.LI.1	2.3.1.AS. 1
Demonstrate understanding and application of sewing processes to design garment features and discuss their functionality in clothing construction.	Discuss garment features and their functions in garment construction. Problem based learning: In mixed gender/friendship groups, identify garment features on different garments and articles. E.g. • Pockets • Sleeves • Collars, etc. Structured Talk for Learning: In mixed ability/gender/friendship groups, use pictures/realia/videos, observe and discuss garment features in pairs. Talk for learning approaches: Discuss in pairs, the functions of garment features. E.g. • To enhance the beauty of the garment. • Finish or neaten the edge of the garment. • It forms part of the garment etc. Present findings for whole class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.3.1.LI.2 Make samples of garment features. Experiential/Project based learning: In mixed gender/random groups, observe a demonstration/video on how to work on garment features. Group Work/problem-based learning: In mixed ability/gender groups make samples of garment features E.g. • Patch pocket • In -seam pocket • Shirt Sleeve • Puff sleeve, etc. Exhibit samples of garment features for gallery walk and appraisal.	2.3.1.AS. 2 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

Teaching and Learning Materials	• Pictures/realia/videos of garment features and principles of design. Fabric • Thread • Hand sewing needle • Sewing machine, scissors, pins • Plain sheets, pencil, crayons, felt pens, sketch pads, tape measure and embroidery thread • Manila card, samples of commercial and homemade patterns and pattern symbols charts.	• Videos /pictures/samples of creative fabric crafts. Machine needle • Plaid and plain ribbon, masking tape, cardboard • Vilene, cushion pad • Local clothing production centres. • Pictures/ realia/videos of packaging materials and packaged clothing, etc.
--	--	--

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.3.1. CS.2	2.3.1.LI.1	2.3.1.AS. 1
Demonstrate knowledge and understanding of customising in clothing construction, emphasising the importance of renovating and remodelling in clothing production.	Discuss customisation and its relevance in sustainable fashion and clothing production. Collaborative/Managing Talk for Learning Approaches: In mixed ability/gender groups, discuss customisation in clothing construction. E.g. Customisation refers to the process of tailoring garments to meet individual preferences or needs. It involves altering design elements like fit, colour, fabric choice and embellishments to create unique and personalised pieces to fit a person's figure type, preferences or certain design specifications. This could be achieved through renovating or remodelling clothing to suit its users, enhance functionality and aesthetic appeal. Experiential Learning/Collaborative Learning: In friendship/mixed ability/gender groups, use talking point strategies to discuss the aspects and benefits of customisation in clothing production. E.g. Major aspects of customisation: • Fit Adjustments: Tailoring garments to match body measurements. • Design Alterations: Modifying style features (e.g., sleeve length, neckline shape). • Personalized Embellishments: Adding embroidery, beading, or prints for a unique touch. • Fabric Selection: Choosing textiles based on comfort, purpose, and style preferences etc. Benefits of customisation: • Enhances self-expression and individuality. • Improves comfort and functionality. • Increases garment longevity by aligning with personal style. • Reduces waste by creating clothing people genuinely love and wear, etc. Present your group work for whole class discussion and appraisal. Group Work: In mixed cultural/random groups, surf the internet for OERs and other sources to identify the relevance of customisation in sustainable fashion and clothing production. E.g. Reducing overproduction and waste:	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	• Made-to-order models: Customised garments are often produced on demand, preventing the excess stock that contributes to landfill waste. • Efficient fabric use: Tailored production can optimise fabric use and reduce scraps etc. Prolonging garment lifespan: • Higher quality and durability: Customized clothing tends to be well-made and cherished, reducing the frequency of disposal. • Repair and renovation: Customised garments can be more easily altered or repaired, extending their wearability over time, etc. Encouraging mindful consumption: • Emotional value: People are less likely to discard garments that reflect their style and fit perfectly. • Reduced trend-driven buying: Customisation promotes timeless, personal designs rather than fast-changing fashion cycles. Supporting local and small-scale production: • Local tailoring and artisan craftsmanship: Customisation often involves local tailors or small businesses, strengthening community economies and preserving craftsmanship. • Ethical Labour Practices: Smaller production batches can be more easily monitored for fair labour practices compared to large-scale factories, etc. In a whole class discussion, present written report for peer and teacher assessment.	
2.3.1.LI.2		2.3.1.AS.2
	Examine the importance of renovating and remodelling of articles. In friendship/mixed ability/gender groups, use talking point strategies to discuss the concept of renovation and remodelling in clothing production. E.g. Renovation: it is making minor changes in the appearance of clothing to renew them. Remodelling: making a different article out of an existing one, etc. Group Work: In mixed ability/gender groups, use videos/pictures/realia of customized clothing/surf the internet to examine the importance of renovating and remodelling of articles. Structured talk for learning Approaches: With the aid of videos, charts, slides or posters, discuss the importance of renovating and remodelling articles.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	E.g. • Environmental impact and sustainability • Financial gains • Conserving sentimental and cultural Value • Individualisation and creative expression • Resource management • Fashion trends, etc. Group work/Collaborative learning Approaches: In mixed ability groups, use talking point/ pyramid discussion/panel discussion to examine the importance of renovating and remodelling articles. Experiential learning: In mixed ability/gender cultural/friendship groups, organise a visit to sewing shops/centres within the community to observe how articles are renovated and remodelled.	
	2.3.1.LI. 3	2.3.1.AS.3
	Describe different ways of renovating and remodelling articles. Talk for learning approaches: In mixed ability/gender groups, think-pair-share the different ways of renovating and remodelling articles and present to class. E.g. Renovation: • Resizing: Taking in, letting out, shortening, or lengthening • Refinishing: Adding linings, replacing buttons or fasteners • Re-dyeing: Colour restoration, tie-dye techniques • Restyling: Altering necklines, changing silhouettes, adding, removing sleeves or changing small sections such as sleeve, collar and hem etc. Remodelling: • Embellishing: Adding embroidery, beading and trimming • Upcycling: Turning old garments into new items or combining fabrics • Repurposing: Turning garments into accessories or using parts of garments, etc. Group Work/ Experiential Learning: In mixed ability/gender/random groups, visit sewing shops/centres in the community to observe how renovation and remodelling of articles are done.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	2.3.1.LI.4 Apply different sewing process to renovate and remodel existing clothing articles to promote customisation and sustainable clothing. Problem based learning: Individually/mixed ability/gender groups, use pictures/samples/videos of renovated and remodelled articles, brainstorm and come up with the processes involved in renovating and remodelling articles. E.g. • Changing skirt and blouse into a straight dress • Changing a pair of trousers into a pair of shorts or skirt • Turning bedspread into pillow cases or arm rest covers • Changing gathered skirt into a fitting skirt, etc. Group work and Collaborative learning: In mixed ability/gender groups, discuss the uses of renovated and remodelled articles E.g. • Extended lifespan of garments • Updated aesthetics • Sentimental value preservation • Eco-friendly living • Community and charity support, etc. Talk for learning approaches: In mixed ability/gender groups, discuss the state of the old articles which require either renovation or remodelling. E.g. • An outgrown garment • Outdated style • Articles with visible worn-out areas Project based learning: • Individually, renovate or remodel your project articles • Display samples of renovated or remodelled articles for gallery walk and appraisal.	2.3.1.AS. 4 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
--	---	--

Teaching and Learning Materials	• Pictures/realia/videos of garment features and principles of design. Fabric • Thread • Hand sewing needle • Sewing machine, scissors, pins • Plain sheets, pencil, crayons, felt pens, sketch pads, tape measure and embroidery thread • Manila card, samples of commercial and homemade patterns and pattern symbols charts.	• Videos /pictures/samples of creative fabric crafts. Machine needle • Plaid and plain ribbon, masking tape, cardboard • Vilene, cushion pad • Local clothing production centres. • Pictures/ realia/videos of packaging materials and packaged clothing, etc.

Subject CLOTHING AND TEXTILES
 Strand 3. CLOTHING AND TEXTILES PRODUCTION TECHNOLOGY
 Sub-Strand 2. FASHION DESIGN AND GARMENT CONSTRUCTION TECHNOLOGY

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
2.3.2. LO I		
Apply basic creative design principles to sketch and pre-image clothing designs for sustainable garment production.	Communication and Collaboration skills: Communicate effectively and confidently verbally and in writing to different participants. Understand, relate to and be sensitive to others (empathic leadership). Speak clearly and convey simple answers or thoughts to a wider group in a group discussion. Share ideas and respect others' views during group work. Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy) Creativity/Innovation and Resourcefulness: Develop new ideas and designs. Design and cut bodice dress, skirt, trousers and shirt using inspirations from the environment. Generate new ideas and designs of packaging. Critical Thinking and Problem Solving: Thinking rationally and make judgement on clothing designs. Design garments to fit different figure types. Think rationally and solve packaging challenges. Digital literacy: Use different ICT tools to surf the internet and for their presentations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds with regards to construction and packaging of clothing articles. • Embrace diversity and practice inclusion. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Practice skill related to clothing construction and respecting others. • Resolve interpersonal conflict with each other. • Have a range of options for completing their work. • Make choices about ways of presenting ideas. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc

2.3.2. LO 2		
Demonstrate mastery of basic garment construction techniques and freehand cutting methods to create functional and aesthetically pleasing garments.	Communication and Collaboration Skills: Communicate effectively and confidently verbally and in writing to different participants. Understand, relate to and be sensitive to others (empathic leadership). Speak clearly and convey simple answers or thoughts to a wider group in a group discussion. Share ideas and respect others' views during group work. Learn from others; to understand and respect the needs, perspectives, and actions of others (empathy). Creativity/ Innovation and Resourcefulness: Develop new ideas and designs. Renovate and remodel existing articles. Create new ideas and designs using inspirations from the environment. Generate new ideas on renovation and remodelling. Critical Thinking and Problem Solving: Think rationally and make judgment on customising clothing articles. Renovate and remodel clothing articles. Digital literacy: Use different ICT tools to surf the internet and for their presentations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds with regards to construction and packaging of clothing articles. • Embrace diversity and practice inclusion in clothing production. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Practice skill related to clothing construction and respecting others. • Resolve interpersonal conflict with each other. • Have a range of options for completing their work. • Make choices about ways of presenting ideas. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.

2.3.2. LO 3	Communication and Collaboration Skills: Communicate effectively and confidently verbally and in writing to different participants. Understand, relate to and be sensitive to others (empathic leadership). Speak clearly and convey simple answers or thoughts to a wider group in a group discussion. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility
Analyse and apply sustainable packaging practices and fabric craft techniques to enhance clothing products and minimise environmental impact.		

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.3.2. CS 1	2.3.2.LI 1	2.3.2.AS 1
Demonstrate an understanding of design visualisation, sketching methods and freehand cutting techniques for clothing construction.	Sketch various garment designs using basic design elements and principles. Problem based learning: Use think-pair-share to review the concept of elements and principles of design E.g. • Elements: dots, colour, shape, line, form and texture • Principles: balance, proportion, emphasis, rhythm and unity, etc. Group Work: In mixed gender/ability groups, sketch clothing designs for different occasions using different elements and principles of design.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.3.2.LI. 2	2.3.2.AS. 2
	Create pre-images of garments with annotations to show design details and construction features. Group Work: In mixed gender/ability groups, pre-image and sketch clothing designs for different occasions.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.3.2.LI 3	2.3.2.AS. 3
	Practice free hand pattern cutting techniques on fabric, exploring methods for shape manipulation and fabric optimisation. Problem based learning: In pairs, describe the different types of patterns and pattern symbols. E.g. Types of patterns: • commercial patterns • Home-made patterns, etc. Pattern Symbols: • Notches • lay to the fold • straight of grain, etc. Project Based Learning: Individually, design bodice block patterns directly on the paper/fabric for bodice, dress, skirt, trousers and shirt. Individually, cut bodice block, dress, skirt, trousers and shirt designs for the garments.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

Teaching and Learning Materials	• Pictures/realia/videos of garment features and principles of design. Fabric • Thread • Hand sewing needle • Sewing machine, scissors, pins • Plain sheets, pencil, crayons, felt pens, sketch pads, tape measure and embroidery thread • Manila card samples of commercial and homemade patterns and pattern symbols charts.	• Videos /pictures/samples of creative fabric crafts. Needle • Plaid and plain ribbon, masking tape, cardboard • Vilene, cushion pad • Local clothing production centres. • Pictures/ realia/videos of packaging materials and packaged clothing • paperboard, plastic bottles, boxes, polybags and flexible pouches, etc.
--	---	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.3.2. CS. 2	2.3.2.LI. 1	2.3.2.AS. 1
Apply skills in garment construction, assembling components through appropriate stitching and finishing methods.	Describe garment construction processes. Experiential/Project based learning: In mixed gender/random groups, observe a demonstration/video to describe how to use garment construction techniques to make garments. E.g. • Pattern drafting • Seam construction • Fastening application, etc. Project Based Learning: Apply garment construction processes to produce pattern for self-made garments for different occasions.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.3.2.LI. 2 Demonstrate the ability to construct basic garments using hand and machine sewing techniques. Experiential/Project based learning: In mixed gender/random groups, observe a demonstration/video on how to use garment construction techniques to make garments. E.g. • Skirts • Shirts • Dresses, etc. Project Based Learning: Apply garment construction techniques to construct basic garments using hand and machine sewing techniques. E.g. • Graining • Laying • Cutting • Ironing • Sewing • Edge finishing, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	2.3.2.LI. 3		2.3.2.AS. 3	
	Evaluate completed garments for quality, fit and durability, proposing improvements where necessary. Experiential Learning: Organise an exhibition to gather information from peers to help evaluate completed garments for quality, fit and durability, proposing improvements where necessary. Reflect the feedback to enhance the functionality of garment.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning	
Teaching and Learning Materials	• Pictures/realia/videos of garment features and principles of design. Fabric • Thread • Hand sewing needle • Sewing machine, scissors, pins • Plain sheets, pencil, crayons, felt pens, sketch pads, tape measure and embroidery thread • Manila card samples of commercial and homemade patterns and pattern symbols charts.		• Videos /pictures/samples of creative fabric crafts. Needle • Plaid and plain ribbon, masking tape, cardboard • Vilene, cushion pad • Local clothing production centres. • Pictures/ realia/videos of packaging materials and packaged clothing • paperboard, plastic bottles, boxes, polybags and flexible pouches, etc.	

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
2.3.2.CS. 3	2.3.2.LI. 1	2.3.2.AS.1
Demonstrate the ability to explore sustainable fashion concepts, incorporating creative fabric manipulation and packaging practices to enhance products.	Discuss the importance of using fabrics creatively and processes of making creative fabric craft. Problem based learning: Individually/mixed ability/gender groups, use pictures/samples/videos of creative fabric crafts to brainstorm and come up with the different ways of using fabrics creatively. E.g. • Patch work • Applique • Soft toys • Cushions • Hand embroidered articles, etc. Group work and Collaborative learning: In mixed ability/gender groups, discuss the importance of using fabrics creatively. E.g. • Prevents waste of fabric scraps. • Saves money. • Develop creative skills. • Save the environment from pollution, etc. Talk for learning approaches: In mixed ability/gender groups, discuss how to make creative fabric craft. E.g. • Items required • Procedure • Designing • Finishing, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	2.3.2.LI. 2	2.3.2.AS. 2
	Experiment with creative fabric craft techniques to add unique design elements to garments. Experiential Learning/Project-Based Learning: In mixed ability/gender groups, visit the local industry to experience at first-hand how fabrics are used creatively. Present reports from the visit to the local industry for class discussions.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning

	E.g. • Tie-dye • Batik • Appliqué, etc. Project based learning: In mixed ability/gender groups, make samples of creative fabrics craft of choice using fabric scraps or old clothing article to reduce clothing waste. Organise an exhibition to display samples of creative fabric crafts for gallery walk and appraisal.	Level 4 Extended critical thinking and reasoning
	2.3.2.LI. 3	2.3.2.AS. 3
	Develop and implement sustainable garment packaging solutions using recycled or biodegradable materials. Problem based learning: In mixed ability/gender groups, brainstorm to explain the meaning of packaging. E.g. Packaging is the science, art and technology of enclosing or protecting products for distribution, storage, sale and use. Discuss the importance of packaging in the clothing industry. E.g. • For easy transportation. • To promote the product. • Protect clothing products from damage, etc. Group Work and Collaborative learning: In mixed ability/gender groups, discuss the different packaging materials. E.g. Packaging materials: • paperboard • plastic bottles • boxes • polybags • flexible pouches, etc. Talk for learning approaches: In mixed ability/gender groups, describe how clothing articles can be packaged.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Experiential Learning: In mixed ability/gender groups, embark on a fieldtrip to a nearby packaging industry or watch a video on packaging to observe and document packaging activities for presentation in groups. <i>Note: Use varied modes of presentation- power point, videos, pictures, etc.</i>		
	Project based learning: Demonstrate in gender groups how to package clothing in different ways.		
	2.3.2.LI. 4		2.3.2.AS. 4
	Discuss the environmental impact of fast fashion and propose ways to promote sustainable clothing production within the community. Project-Based Learning/Experiential Learning: In mixed ability/gender groups, visit fashion/clothing production centres to conduct interview to find out the environmental impact of fast fashion and ways of promoting sustainable clothing production in the community. Whole class discussion: Present your findings for discussion and peer assessment. Talk for Learning/Collaborative Learning: In a panel discussion, recommend ways to promote sustainable clothing production within the community. Share your personal experiences of waste clothing materials and how individual and family clothing management practices influence sustainable clothing production.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Pictures/realia/videos of garment features and principles of design. Fabric • Thread • Hand sewing needle • Sewing machine, scissors, pins • Plain sheets, pencil, crayons, felt pens, sketch pads, tape measure and embroidery thread • Manila card samples of commercial and homemade patterns and pattern symbols charts.	• Videos /pictures/samples of creative fabric crafts. Needle • Plaid and plain ribbon, masking tape, cardboard • Vilene, cushion pad • Local clothing production centres. • Pictures/ realia/videos of packaging materials and packaged clothing • paperboard, plastic bottles, boxes, polybags and flexible pouches, etc.	

YEAR THREE

Subject
Strand
Sub-Strand

CLOTHING AND TEXTILES
PSYCHOSOCIAL ASPECT OF CLOTHING
UNDERSTANDING CONCEPTS AND PRINCIPLES OF CLOTHING

Learning Outcomes	21 st Century Skills and Competencies	GESI ⁵ , SEL ⁶ and Shared National Values
3.1.1.LO.1		
Employ understanding, principles and skills of clothing production to explore and evaluate entrepreneurial opportunities in the clothing and textiles industry.	Critical thinking and problem-solving skills: Think and reflect on ideas shared in group work. Communication and Collaboration skills: Work in groups to share ideas about the various types of careers. Make presentation in both oral and written modes in group work. Digital literacy: Apply ICT tools and skills to create/watch videos and surf the internet for clothing and textiles careers. Personal development and Leadership skills: By taking leading roles in group work in confidence, humility and respect.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals' different backgrounds in the choice of careers and interests. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate to clothing production. • Interrogate their stereotypes and biases about gender and the role men and women play in clothing production. • Identify injustice, especially in recognition of the contributions of different groups and individuals to the effective management and maintenance of the home. • Sensitive to the inter-relatedness of the various aspects of life. • Value and promote justice in home and in society. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Reflect on career choices and the consequences of each choice. • Build learners' self-confidence to achieve success in life. • Practice and manage different thoughts and behaviours in clothing selection and production.

⁵ Gender Equality and Social Inclusion

⁶ Socio-Emotional Learning

		• Evaluate various real-world scenarios and make decisions based on the information at hand. National Values: • Tolerance • Friendliness • Openness • Patience • Hard work • Humility, etc.
--	--	--

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
3.1.1.CS.1	3.1.1.LI.1	3.1.1.AS.1
Investigate potential career paths and entrepreneurial ventures within the clothing and textiles industry.	Identify different careers in the Clothing and Textiles industry. Problem based learning: In mixed ability/gender/cultural groups, brainstorm, brain-write or think-square-share to identify career opportunities in the Clothing and Textiles industry. E.g. • Dressmaker/tailor • Launderer • Embroidery maker • Entrepreneur • Tie-dye producer, etc. Experiential learning Approaches: In mixed gender/friendship groups, visit a community to identify varied career opportunities available in the Clothing and Textile industry and report.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	3.1.1.LI.2	3.1.1.AS. 2
	Research into career opportunities in the textile industry. Group work and Collaborative learning: In mixed gender/mixed ability groups, read relevant texts, charts, slides, videos or surf the internet for career opportunities in the Clothing and Textiles industry. E.g. • Clothing technologist • Computer aided design programmer • Millinery and accessories producer • Quality control inspector, etc. Experiential Learning Approaches: In mixed gender/ability groups, visit clothing and textiles industries to ascertain other career opportunities.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	3.1.1.LI.3 Analyse skills, values and attitudes needed for the career opportunities identified. Collaborative and talk for learning approach: In mixed ability/gender groups, use talking point to discuss the skills, values and attitudes needed for the career opportunities in Clothing and Textiles and present it in class. E.g. Skills: • Cutting • Joining • Dyeing • Embroidery making • Laundering • Designing • Interior decoration • Pattern making, etc. Values and attitudes: • Have a positive attitude (can-do spirit) • Present an acceptable appearance • Respond well to criticism • Be honest with your employer/client • Meeting deadlines, etc. Experiential Learning Approaches: In mixed ability/gender groups, watch videos, charts, pictures depicting skills, values and attitudes needed for varied careers in Clothing and Textiles. Visit a clothing and textiles establishment to observe the skills, values and attitudes exhibited at the workplace. Project: Visit a local Clothing and Textiles establishment of choice, observe and engage workers to find out the skills, values and attitudes exhibited at the workplace. Present findings using varied modes of presentations. Collaborative/managing talk for learning approaches: In friendship/mixed ability/gender groups, explain how skills, attitudes and values are important in the clothing and textiles industry.	3.1.1.AS.3 Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
--	---	--

	E.g. • Collectively determine an employee's ability to perform their job effectively • Allows employees to learn new skills and keep up with evolving industry demands • Guide employees to make morally sound choices in challenging situations • A positive attitude leads to greater initiative, creativity and productivity, etc. Group work and Collaborative learning: In mixed gender/mixed ability groups, role-play on some of the skills, values and attitudes needed for career opportunities in the Clothing and Textiles industry. Learner's peer-review other groups presentations.	
Teaching and Learning Materials	• Texts • Power point slides • Charts • Videos depicting career opportunities in the Clothing and Textiles industry.	• Projectors • Computers Mobile phones • Videos • Picture, etc.

Subject CLOTHING AND TEXTILES
 Strand PSYCHOSOCIAL ASPECT OF CLOTHING
 Sub-Strand WARDROBE PLANNING AND APPEARANCE MANAGEMENT PRACTICES

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
3.1.2.LO.1		
Employ various work ethics, attitudes, values in planning modelling and fashion show as a marketing strategy in promoting the clothing and textiles industry.	Communication and Collaboration Skills: Share ideas and respect others' views in group work and presentation. Use accommodative expressions in presentations and feedback. Critical thinking and problem-solving skills: Analyse the implications of good and bad work ethics in Clothing and Textiles establishment. Think rationally and make judgement of factors to consider when planning an exhibition. Digital Literacy: Ability to use ICT tools to gather information on work ethics and during group presentations. Use ICT tools to look for new information and also make presentations. Creativity and Innovation: Come up with new ideas and designs when planning and mounting an exhibition. Exhibit modelling skills in a fashion show. Come out with new or novel ideas to create their own Clothing and Textiles enterprises/small scale businesses (entrepreneurial skills). Personal development and leadership skills: Walk gracefully in a fashion show. Build self-confidence in group and individual presentations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Appreciate individuals of different backgrounds in Clothing and Textiles industries. • Accept diversity and practice inclusion in teamwork. • Examine and dispel misconceptions/myths about gender as they relate to clothing and textiles industries. • biases about gender and the role men and women play in clothing and textiles industries. • Identify ethical issues that affect clothing and Textiles industry management. • Value and promote justice in Clothing and Textiles industry. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will

		be equipped with social emotional learning skills to: • Listen to peers' opinions and express disagreements in constructive ways. • Enforce clear expectations regarding behaviours toward others when modelling. • Set goals and work to achieve them. • Use range of strategies to help manage work (e.g., checklists, reminders, prompts) when planning exhibition and modelling. National Values: • Tolerance • Friendliness • Open mindedness • Patience • Hard work • Humility, etc.
--	--	---

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
3.1.2.CS.1	3.1.2.LI.1	3.1.2.AS.1
Demonstrate knowledge, understanding of wardrobe planning and appearance management principles in organising modelling and fashion show to promote clothing and textile industries.	Explain the purpose of modelling and fashion shows and the basic requirements for modelling. Problem based learning: In mixed gender/ability groups, brainstorm the meaning of modelling and fashion show. E.g. • Modelling is the live presentation of dress designs and the suggested use for presentation. • Fashion show is a special event that communicates a clothing trend, story, value and quality message to prospective customers, and it is also a sales presentation activity which usually advertises the designer, etc. Group work/collaborative learning: In mixed gender/ability/friendship groups, discuss the purpose of modelling and fashion show. E.g. • Enhance the designer's image. • Attract customers. • Encourage multiple sales, etc. Discuss the basic requirements for modelling: E.g. • Self-confidence • Basic modelling • Pleasant disposition, etc. Present group reports for whole class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	3.1.2.LI.2	3.1.2.AS.2
	Discuss factors to consider when planning a fashion show. Experiential Learning/Structured Talk for Learning Approaches: In mixed gender/ability groups, watch videos/pictures/posters or surf the internet for the types of fashion shows and present reports for class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning

	E.g. • Formal fashion show • Department fashion show • Informal fashion show • Designer fashion show, etc. Talk for learning Approaches: In mixed gender/ability/friendship groups, use talking points to discuss factors to consider when planning a fashion show. E.g. • Selection of venue • Relevance to the business • Cost involved • Publicity • Garments to be modelled, etc. <i>Note: learners should act as models.</i>	Level 4 Extended critical thinking and reasoning
	3.1.2.LI.3	3.1.2.AS.3
	Prepare the fashion show and model self-made garments. Experiential Learning Approaches: In mixed gender/ability groups, watch videos on fashion shows and modelling sessions. Problem-Based Learning: Prepare, put up a fashion show and model with a self-made garments, accessories and cosmetics. <i>NOTE: Set a panel to observe and assess learners during the modelling and fashion show.</i> Visit a local Clothing and Textiles establishment of choice, observe and engage workers to find out the skills, values and attitudes exhibited at the workplace. Present findings using varied modes of presentations. Role-play on some of the values and attitudes needed for career opportunities in Clothing and Textiles.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Collaborative/managing talk for learning approaches: In friendship/mixed ability/gender groups, explain how skills, attitudes and values are important in the clothing and textiles industry. E.g. • Collectively determine an employee's ability to perform their job effectively • Allows employees to learn new skills and keep up with evolving industry demands • Guide employees to make morally sound choices in challenging situations • A positive attitude leads to greater initiative, creativity and productivity, etc. Group work and Collaborative learning: In mixed gender/mixed ability groups, role-play on some of the skills, values and attitudes needed for career opportunities in the Clothing and Textiles industry. Learner's peer-review other groups presentations.	
Teaching and Learning Materials	• Texts • Power point slides • Charts • Videos depicting career opportunities in the Clothing and Textiles industry. • Projectors • Computers Mobile phones • Videos • Pictures, etc.	

Subject **CLOTHING AND TEXTILES**
 Strand **2. TEXTILES IN CLOTHING**
 Sub-Strand **1. CHARACTERISTICS OF FIBRES AND FABRICS FUNCTIONALITY**

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
3.2.1.LO.1		
Apply knowledge, understanding and skills in fabric finishes to select, use and care for fabrics and clothing.	Communication and Collaboration Skills: Share ideas in group orally and in written forms. Respect and accept group members contributions. Communication and Collaboration Skills: Share ideas and respect others' views in group work Critical thinking and problem-solving skills: Analyse the implications of fabric finishes. Creativity and Innovation: Use fabrics with different finishes creatively in clothing-production. Digital Literacy: Use ICT tools to gather information on fabric finishes and during group presentations.	GESI: Learners having experienced a teaching approach that ensures gender equality and social inclusion, where they work with each other in an inclusive way; cross-sharing knowledge and understanding among groups and individuals lead them to: • Respect individuals of different backgrounds. • Embrace diversity and practice inclusion. • Examine and dispel misconceptions/myths about gender as they relate to care of fabrics and clothing. • Interrogate their stereotypes and biases about gender and the role men and women play in the use of fabrics. • Acknowledge and recognise the contributions of different groups (male, female and different cultures) to the production and care of clothing. • Be sensitive to the effect of chemicals on various textile fabrics. • Value and promote clothing care and maintenance in homes and society. SEL: Learners having been given the opportunity to experience varied teaching approaches in an enabling environment will be equipped with social emotional learning skills to: • Evaluate own work. • Make connections between classroom activities and personal goals.

		• Practice and respect each other's skills in relation to the use and care of clothing. National Values: • Friendliness • Open mindedness • Patience, • Hard work • Humility, etc.
--	--	--

Content Standards	Learning Indicators and Pedagogical Exemplars with 21 st Century Skills and GESI	Assessment
3.2.1.CS.1	3.2.1.LI. 1	3.2.1.AS. 1
Demonstrate knowledge, understanding, principles and skills of fabric finishes to use, care and manage to ensure clothing functionality.	Explain fabric finishes and its relevance in clothing construction. Problem based learning: In pairs/mixed ability groups, brain-write/brainstorm to explain in your own words, fabric finishes with specific examples. Group work/ Collaborative learning: In pairs/mixed ability groups, read relevant texts, charts, slides, pictures, videos or surf the internet to explain fabric finishes, purpose of a finish and classify finishes. E.g. Finishes is treatment given to the textile products to change their undesirable characteristics and make their products acceptable to consumers. The purpose of a finish may be: • Basic • Aesthetic • Functional, etc. Classification of finishes: • Permanent finish • Durable finish • Temporary finish • Renewable finish, etc. In plenary, share findings for whole class discussion.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	3.2.1.LI. 2	3.2.1.AS. 2
	Discuss the types of fabric finishes and characteristics. Collaborative/managing talk for learning approaches: In mixed ability/gender groups, discuss the types of fabric finishes. E.g. • Embossing • Glazing • Shrinkage control • Surface shining, etc.	Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning

	Group work: In mixed ability/gender groups, use videos/pictures/realia of finished fabrics/surf the internet for emerging fabric finishes. Present report to class for discussion.		
	3.2.1.LI. 3		3.2.1.AS. 3
	Analyse the implications of the finishes to each fabric use. Problem based learning: In mixed gender/ability groups, discuss the implications of fabric finishes on the following: • Use • Cutting • Sewing • Care of clothing, etc. Group work and Collaborative learning: In mixed gender/ability groups, present group report for whole class discussion.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
	3.2.1.LI. 4		3.2.1.AS. 4
	Research into fabric finishes and produce a report. Experiential learning: In mixed gender/ability groups, visit haberdashery/fabric shops and take videos/ pictures/samples of different fabric finishes. Group work and Collaborative learning: Groups produce reports and present for whole class discussions and appraisal.		Level 1 Recall Level 2 Skills of conceptual understanding Level 3 Strategic reasoning Level 4 Extended critical thinking and reasoning
Teaching and Learning Materials	• Videos • Pictures • Charts • Slides	• Texts Computer • Projector • Mobile phones • Realia of finished fabrics/videos/pictures	• Samples/videos/pictures of different fabric finishes. • Camera • Flip chart • Pair of scissors, etc.

Subject CLOTHING AND TEXTILES
 Strand 3. CLOTHING AND TEXTILES PRODUCTION TECHNOLOGY
 Sub-Strand 1. CLOTHING CONSTRUCTION PROCESSES

Learning Outcomes	21 st Century Skills and Competencies	GESI, SEL and Shared National Values
3.3.1.LO.1		
Apply practical business skills to plan, launch and sustain clothing and textiles enterprises.	Communication and Collaboration Skills: Share ideas and respect others' views in group work and presentation. Use accommodative expressions in presentations and feedback. Critical thinking and problem-solving skills: Analyse the implications of good and bad work ethics in Clothing and Textiles establishment. Think rationally and make judgement of factors to consider when planning an exhibition. Digital Literacy: Ability to use ICT tools to gather information on work ethics and during group presentations. Use ICT tools to look for new information and also make presentations. Creativity and Innovation: Come up with new ideas and designs when planning and mounting an exhibition. Exhibit modelling skills in a fashion show. Come out with new or novel ideas to create their own Clothing and Textiles enterprises/small scale businesses (entrepreneurial skills). Personal development and leadership skills: Walk gracefully in a fashion show. Build self-confidence in group and individual presentations.
